BUSINESS *and* ENTERPRISE SYSTEMS

Business and Enterprise Systems (BES) Directorate is the Information Technology (IT) leader for the Department of the Air Force (DAF) community and Department of War (DoW), delivering comprehensive IT solutions and providing expert contracting, acquisition and program management support. BES operates, integrates, and innovates enterprise IT capabilities while bolstering the modernization the infrastructure to support the warfighter across the combat and mission support spectrum.

Global Impact

- ❖ Delivers innovative enterprise IT solutions for the benefit of the warfighter
- ❖ Provides a robust, globally interconnected network environment where timely data is shared seamlessly among users, applications and platforms
- ❖ Supports the AF Network Operations (AF NetOps) goal of promoting Netcentricity

Who We Are

- ❖ 2,200+ Personnel across three states
- ❖ 120+ Programs
- ❖ 200+ Stakeholders
- ❖ Annual Portfolio Value: \$1,249.4M (FY25)

BUSINESS AREAS:

- Acquisition
- Civil Engineering
- Communications
- Contracting
- Finance
- Infrastructure IT
- Services Logistics
- Maintenance
- Medical
- Munitions Operations
- Personnel
- Transportation

Business and Enterprise Systems Directorate

Program Executive Officer and Director,
Business & Enterprise Systems Directorate

VENDOR COMMUNICATIONS

We developed relationships with our Industry Partners, delved deeply into issues affecting the BES Directorate, exchanged meaningful information and incorporated many of your ideas. The Vendor Communications Forum has helped make us a better organization.

The Numbers

300+
ATTENDEE
PER EVENT

110+
COMPANIES
PER EVENT

BES vendor communications events have created a frequent dialogue between BES, our partners and potential partners, generated networking opportunities and created open and transparent processes. Through these initiatives, BES has fostered stronger government-industry relationships and enabled industry to directly hear some of the challenges and opportunities BES faces in order to continue to operate, integrate, and innovate enterprise IT capabilities to support the warfighter.

VENDOR COMMUNICATIONS INITIATIVES:

- Vendor Industry Day – Spring Upcoming Acquisitions
- Vendor Exchange Forum – Selected Vendor Presentations to BES Personnel
- Vendor Communications Website
- BES Reference Guide – Quarterly Update
- BES Smart Guide – Quarterly Update

Registration for Vendor Industry Day and Vendor Exchange Forum is free of charge and open to government and industry with experience and/or interest in each respective topic.

G

The Small Business Office (SBO) serves as the primary advocate for small business inclusion in Business and Enterprise Systems (BES) acquisition opportunities. The SBO promotes awareness and shared understanding of relevant laws, regulations, and policies among acquisition professionals and small businesses. Additionally, it provides guidance on how to do business with BES and the broader Department of the Air Force (DAF), and as a key resource for information related to acquisition opportunities within the BES portfolio.

MISSION

The SBO's mission is to champion small businesses and their ability to deliver innovative and agile solutions that meet warfighter needs through:

- Advocating for acquisition strategies that maximize small business participation
- Conducting industry outreach and Government in reach training
- Fostering connections between small business partners and their innovative solutions with the appropriate DAF requirements

PROGRAM GOALS

1. Strengthen the Defense Industrial Base by maximizing small business participation in DAF acquisition opportunities, with a focus on delivering innovative and agile solutions that support mission readiness
2. Advocate for acquisition policies, procedures, and practices that promote competition and enhance accessibility and encourage integration of innovative capabilities from small businesses
3. Promote and strengthen engagement with small businesses by fostering meaningful connections, encouraging collaboration and expanding outreach efforts to ensure inclusive participation in BES and DAF acquisition opportunities

KEY OBJECTIVES

- Provide training and education to help small businesses understand BES contract opportunities and effectively market themselves to the DAF community
- Advocate for acquisition strategies that create maximum practical opportunities for small business participation, whether through contracts, subcontracts, or other flexible business arrangements.
- Elevate awareness and the value of small business contributions through strategic communication with internal and external stakeholders emphasizing their roles in driving innovation and responsiveness
- Enhance small business engagement through hosting and participating in focused outreach events (e.g., matchmaking sessions, industry days, seminars, workshops) that reach a broad audience
- Provide one-on-one counseling to guide small businesses in pursuing federal opportunities and resolving specific challenges

CONTACT

Ms. Yolanda B. McCain
Director, Small Business Programs
yolanda.mccain@us.af.mil

G

The Small Business Office (SBO) is the primary advocate for inclusion of Small Business in BES acquisition opportunities; providing awareness, shared knowledge and understanding of laws, regulations and policies to acquisition professionals and small businesses. The SBO also provides guidance on How to Do Business with BES and serves as a resource for information related to acquisition opportunities within the BES portfolio.

The SBO's mission is to champion Small Businesses and their ability to provide first class solutions to meet the needs of the warfighter by advocating for acquisition strategies that provide maximum practical SB participation, performing industry outreach and connecting small business partners and their solutions with the right Department of the Air Force (DAF) requirement.

THE GOALS OF THE SMALL BUSINESS PROGRAM:

1. To maximize small business participation in acquisition opportunities within the DAF
2. Ensure that our acquisition policies, procedures and practices foster competition for small businesses in the federal acquisition process
3. Assist small businesses, including veteran-owned, service-disabled veteran-owned, HUBZone, small disadvantaged, and women-owned small business concerns in marketing their services to the DAF for successful acquisitions

KEY OBJECTIVES

- Provide training and education to increase understanding of BES contract vehicles and to successfully market your capabilities to the DAF community
- Host and attend monthly, quarterly and annual small business events (i.e: matchmaking, industry days, seminars, workshops, etc.)
- Increase the awareness of small business capacity and their contributions to the AF community
- Conduct one-on-one counseling sessions, at the request of small businesses, to guide them on how to best pursue federal opportunities and address specific questions and challenges they may face
- Communicate with internal and external audiences to advocate for small businesses and the capabilities they bring to the AF mission
- Review and approve internal acquisition strategies which promote maximum practicable opportunities for small businesses to participate in procurement opportunities, through contracts, subcontracts, task orders, etc

G

GB4 Portfolio

**GBS ENTERPRISE
LOGISTICS READINESS**

**GBM MAINTENANCE &
INSTALLATION SYSTEMS**

MISSION

Deliver integrated logistics information driving war-winning decisions by shaping, acquiring and sustaining warfighting IT capabilities and mission support

CAPABILITIES

Enable the Operational Logistics Systems of the Air Force

ACQUISITION DUE IN SYSTEM (ADIS/J041)

ADIS (J041) provides a single repository of information for items centrally procured at the Air Logistics Centers (ALCs). The system maintains and processes data for contracting and requirements activities from purchase request (PR) initiation (pre-award), through the contract life cycle to closeout (post-award) and maintains historical data on stock numbered items. Although primarily oriented to acquisitions via contracting, it also maintains records of material being acquired through reclamation projects and contract termination inventories. ADIS J041 specifically excludes classified contracts and operational contracting actions (local purchase).

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF Lifecycle Management Center (AFLCMC), Tinker AFB, Hill AFB, Robins AFB – Buyers, Item Managers

Current Contractor/Contract Type: Absolute Strategic Technologies/FFP

System Type: Mainframe

Number of Users: 3,000

Subsystems: N/A

WARFIGHTER BENEFITS

- Enables the warfighter to have the parts needed to perform the missions to fly, fight, and win
- Provides information for better planning so that critical resources are available on-time, at a fair and reasonable cost

CONTACT

Capability Delivery Manager:

Mr. Eddy Huang
937-257-7685

AF DSS is an Office of the Secretary of Defense (OSD) directed shipping/receiving/storing system mandated to provide Positive Inventory Control (PIC) of all AF-owned Nuclear Weapons Related Material (NWRM) processed at the Depot level. AF DSS passes critical financial and logistical (item management) data to D035K (Wholesale and Retail Receiving/Shipping System – WARRS) which then passes the data to D035J (Financial Inventory Accounting and Billing System – FIABS), thus impacting accounting and auditable records of NWRM. AF NWRM items are stored in multiple locations, but the only AF Wholesale (Depot Level) storage/repair facility for AF NWRM is located at the NWRM Storage Facility (NSF), Hill AFB, Ogden, UT. Pending decommission NLT 30 Sep 26. DLA's Warehouse Management System will serve as the replacement system.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AFSC/LZRA

Current Contractor/Contract Type: N/A

System Type: Mainframe

Number of Users: 23

Subsystems: N/A

WARFIGHTER BENEFITS

- Ensures PIC during receipt, storage and distribution of wholesale level NWRM00

Capability Delivery Manager:

Ms. Danielle Meeks-Harshaw

937-713-1973

AF-PLM enables the Digital Enterprise by creating the linkages and synchronization needed between derived technical data types throughout the lifecycle as well as enabling other external tools and processes requiring data across the logistics and engineering communities. AF-PLM is foundational to enabling Digital Materiel Management (DMM) across AF weapon systems. It addresses the core of AFMC, the product data of its systems by providing an enterprise capability that integrates lifecycle management processes through the creation, access, management and control of product data. It is a key enabler for Weapon System Program Offices, AF Digital Enterprise (SAF/AQR), and Log-IT (AF/A4P).

The AF-PLM Capability Support Office (CSO) is executing its five lines of attack to implement the foundational capabilities expanding additional capability based on customer need.

1. Implementation and support of the materiel solution
2. Standard reengineered business processes
3. Create and update AF policy
4. Standard data (model-based); convert legacy data (as applicable)
5. Workforce Development

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF Weapon System Programs, Wright-Patterson including Ogden, Warner Robins and Tinker Air Logistics Complexes, AFMC/EN, AFLCMC/LZ Engineering and Logistics Functional Area

Current Contractor/Contract Type: Sabel Systems/Siemens Govt Technologies/FFP/IDIQ

System Type: Cloud One Enterprise Commercial-Off-The-Shelf (COTS) application

Number of Users: ~4,381 Current Users

Subsystems: N/A

WARFIGHTER BENEFITS

- Evolves the AF enterprise from low fidelity drawings to high fidelity models
- Builds and manages a comprehensive digital product definition
- Creates a complete digital thread of product information from concept to delivery (includes Item Master and Maintenance Repair and Overhaul initiatives)
- Institutes a single collaborative environment for engineering and logistics information
- Establishes connectivity across the enterprise
- Integrates and optimizes product data processes
- Maximizes engineering and logistics adoption and organizational value

AISG (M024B) is an AF Materiel Command (AFMC) essential system that provides a communications medium for the AF mainframe and mid-tier data transfers to DLA. AISG provides communication support through the conversion of data to/from the different formats that DLA and the AF require for intersite communications throughout AFMC. AISG translates data from one format to another for the gaining system to understand and process the data properly (e.g. Military Standard Requisitioning and Issue Procedures (MILSTRIP) to Defense Messaging System format, vice versa). AISG is a behind-the-scenes transport gateway with no “front-end” website.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AFMC Systems, AFMC/FM, AFSC/FM, AFLC/LZ, DAAS, DLA, and other DoW agencies

Current Contractor/Contract Type: Alaska Northstar Resources/ FFP

System Type: Web-based system hosted in Cloud One Amazon Web Services (AWS)

Number of Users: No Users – AISG is a system-to-system interfacing application

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides worldwide 24/7 support for Department of War (DoW) logistics systems and supports information flow from the AFMC core logistics systems to other DoW organizations
- AISG supports 72 interfaces, sending or receiving approximately 460,000 transactions daily
- AISG translates data from one format into another format for proper processing by the gaining system(s)

ARIS is a critical component of Air Force readiness, providing comprehensive resource management and reporting capabilities across Active Duty, Air National Guard, and Air Force Reserve components. ARIS supports base-level and higher headquarters functions within Civil Engineering, Security Forces, and Services, enabling data-driven decision-making for optimal resource allocation and Unit Type Code (UTC) management. This interoperable, user-friendly system streamlines readiness reporting and enhances situational awareness in both routine operations and contingency environments. ARIS is essential for maintaining peak operational effectiveness and ensuring mission success across the Total Force.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AF Civil Engineering Center

Primary Customer: AF Civil Engineering Center

Current Contractor/Contract Type: IPT Exter/FFP

System Type: Web

app on Cloud One (C1)

Number of

Users: 13,000+

Subsystems: N/A

WARFIGHTER BENEFITS

- Ensures deploying personnel are properly equipped and trained to support contingency operations
- Manages and tracks the Meal Ready to Eat (MRE) inventory across Air Force
- Provided real-time data input and information output necessary for effective resource allocation in support of critical mission requirements

CONTACT

Capability Delivery Manager:

Ms. Tiffany Fitzgerald

334-416-6050

CMOS is a joint use system in use at 359 active sites in the AF, Army, Marine Corps, and the National Security Agency to automate, streamline cargo and passenger movement, and support rapid movement of military assets worldwide. CMOS is a web-enabled application accessed via PKI/CAC. Handheld Terminals (HHTs) reduce manual data entry by scanning Automated Information Technology (AIT) embedded labels and documentation barcodes.

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF, Army, Marine Corps, and National Security Agency

Current Contractor/Contract Type: Ignite Fueling Innovation, Inc./FFP

System Type: Web-enabled, Defense Information Systems Agency (DISA) Montgomery

Number of Users: 2,905

Subsystems: N/A

WARFIGHTER BENEFITS

Provides traffic and theater distribution managers the ability to:

- Receive electronic data from shippers: Service Military Standard Requisitioning and Issue Procedures (MILSTRIP) supply systems, non-MILSTRIP (DD Form 1149) shippers and unit deployment systems, thus reducing inaccurate manual data entry, improving cargo and personnel processing times
- Produce commercial and military movement documentation for deployment of cargo and passengers
- Improve auditability of the vendor pay system in support of Office of Secretary of Defense (OSD) Financial Improvement and Audit Readiness (FIAR) mandates
- Produce bar coded Military Shipping Labels readable by all DoW trans-shipment and receiving points reduces labor hours and improving productivity for both shipping and receiving points
- Commission license plate Radio Frequency Identification (RFID) tags in support of Combatant Commander (CoCOM) and OSD tagging requirements to improve asset visibility; improve convoy tracking by interfacing with RF In-Transit Visibility (ITV) portal and reporting tag numbers to include Nano tag numbers
- Provide item ITV information electronically to the Integrated Data Environment (IDE)/Global Transportation Network (GTN) Convergence (IGC) Program
- Exchange data with military and commercial trading partners using standard Electronic Data Interchange (EDI) formatted transactions, reducing manual processing times

G

CAV AF is a web-based Government off-the-Shelf (GOTS) application. The CAV AF database facilitates government and commercial contract repair activities to report repair and shipping transactions daily and maintains accountability of Government Furnished Material (GFM) and Government Furnished Equipment (GFE). CAV AF was designed to allow a wide range of transaction reporting, eliminate financial/inventory imbalances, operate in a fully automated capacity, and provide specific carcass tracking and accountability while material is at the commercial repair activity. Currently scheduled for 30 Sep 2027 subsumption.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4/10/A4RX

Primary Customer: Ogden, Oklahoma City and Warner Robbins Air Logistics Complexes (ALC), Nuclear Weapons Related Materials and Cryptologic Systems Groups – Item Managers, Product Management Specialists, Contract Managers

Current Contractor/Contract Type: COHO Technology Solutions/FFP

System Type: Web-based, Oracle database

Number of Users: 1,200

Subsystems: N/A

WARFIGHTER BENEFITS

- Enables 24/7 global access to Contracted Depot Maintenance (CDM) vendors to requisition GFM and report status of repair activities
- Enhances status reporting between the repair activities and the Air Logistic Complex (ALC) leads to greater inventory accuracy and item accountability
- Provides supply planners the means to track material in-transit to and from the contractor's repair site and allow daily transaction reporting while minimizing negative impact to the commercial repair activity

CE NexGen IT replaced several legacy Civil Engineer (CE) systems with modernized capabilities and deploying industry best practices. The core CE NexGen IT solution provides AF/A4C automation which enables future CE IT capabilities. The NexGen IT application consists of integrated modules with embedded/configurable best business practices and capabilities in Real Estate, Energy, Computerized Maintenance Management System (CMMS), Project Management, and Space Management. Real Estate Management is the process of managing space and transactions at an installation and consists of four sub-processes: Manage Transactions, Manage Space Occupancy, Manage Contracts, Conduct Move Planning and Management. The Real Estate Management function is a key driver in executing plans from Project Management, as well as a provider of feedback in the development of future plans.

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: AFMC/A4C

Primary Customer: United States AF Civil Engineer Community

Current Contractor/Contract Type: Serco (NA), Inc./FFP

System Type: Web-based

Number of Users: 43,000+

Subsystems: N/A

WARFIGHTER BENEFITS

- CE NexGen IT provides an integrated asset management system for the Civil Engineering (CE) community with capabilities to support Cost Accounting, Operations (Work Management, Service Contracts and Material Control), Real Property, Project Management, and Energy Management
- Supports data transparency between civil engineers at all levels, Installations, Major Commands and Higher Headquarters (HHQ), to enable agile decision making
- CE NexGen IT is a key component of the Civil Engineer Transformation (CET), as the system standardizes and enforces transformed business processes and organizational roles
- Allows installation leadership full visibility on day-to-day operations, and eliminates the need for external reports or data calls between flights

CIDS (J018R) is the primary mechanism for providing pre-award and post-award contracting data to AF supply chain systems. CIDS contract delivery information is critical to the AF supply chain forecasting systems. Without this data, the supply chain forecasting systems do not have the data needed to perform their re-ordering function. CIDS supports over 3,000 AF supply chain personnel, enabling these users to obtain near real-time tracking status on contracting actions involving weapon system spares, including mission capable (MICAP) tracking. CIDS processes over \$11B annually in procurement action tracking and completes over 79 million transactions to update supply chain management requirements and solutions. Data tracked in CIDS form the basis of the Office of Secretary of Defense (OSD) and AF metrics on Administrative Lead Time (ALT) and Production Lead Time (PLT).

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF Lifecycle Management Center (AFLCMC), Tinker AFB, Hill AFB, Robins AFB – Buyers, Item Managers

Current Contractor/Contract Type: Absolute Strategic Technologies/FFP

System Type: Client-Server

Number of Users: 3,000

Subsystems: N/A

WARFIGHTER BENEFITS

- Maintains and processes data for contracting and requirements activities from PR initiation (pre- award) through the contract lifecycle to close-out (post-award), and maintains historical data on stock numbered items
- Supports the ALCs with the ability to obtain near real-time tracking status on contracting actions involving weapon system spares, including mission capable (MICAP) tracking
- Expedites purchase request processing by reviewing contract data derived from ADIS J041

CONTACT

Capability Delivery Manager:

Mr. Eddy Huang

CSWS DE is the only capability the AF has to obtain data from contractor databases to populate AF systems. CSWS DE facilitates data between the Contractor Inventory Control Points (CICPs) and AF legacy systems that do not allow direct commercial access. This enables contractors to input and view, with Government concurrence, needed information. It is automated web-based tech solution to collect spares, parts usage, failure rate and pipeline data from contractors and pass that data to Government legacy systems. This provides asset visibility from forward operating locations to supply systems, to contractor and perhaps to supplier inventories. Spares Support IPT have on-line edit and query capabilities and users visibility of spares and usage data via the internet. Introduction: CSWS DE was an AF/A4LR initiative to provide visibility of contractor controlled weapon system item usage data during all phases of operational use. This data enhances the Government's position in determining the spares requirements at the transition point decision to continue with contractor Contract Logistics Support (CLS).

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF Sustainment Center (AFSC), Contractor Inventory Control Points (CICPs) and AF systems

Current Contractor/Contract Type: JYG Innovations/FFP

System Type: Web-based

Number of Users: 60

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides item repair status to the contractor for items repaired at the AF Air Logistics Center (ALC) under the Depot Partnering initiative or the ALCs for items repaired at contractor sites
- Single automated source of mission essential packaging, handling, storage, transportation data, repair destination routing, asset ownership, stock balances on Contractor-Inventory Control Point (C-ICP) managed assets to the warfighter
- Provides Item Manager and Equipment Specialist assignment; RIMCS updates; PHS&T inputs; and Depot Partnering Repair data
- Serves as the link between contractor logistics support (CLS) activities and other AF systems

CONTACT

Ms. Danielle Meeks-Harshaw

937-713-1973

CDRS (DSD: Q111A) is a cloud-based Air Force Materiel Command (AFMC) application that serves as the authoritative data source for AFMC Interface Control Documents (ICDs). By utilizing a standardized data dictionary, CDRS facilitates the creation and management of ICDs, which details data needs and tracks the flow of information resources between AFMC data systems. CDRS is crucial for establishing a clear understanding of data interdependencies within AFMC. It interfaces with Information Systems Management Tool (ISMT) and Advana BLADE. CDRS is essential for maintaining high standards of data governance, reinforcing transparency, integrity, and operational efficiency across logistics IT systems.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AFMC and other DoW Business and Enterprise Systems PMOs and FMOs

Current Contractor/Contract Type: Alaska Northstar Resources /FFP

System Type: Web-based system hosted in Cloud One Amazon Web Services (AWS)

Number of Users: 600+

Subsystems: N/A

WARFIGHTER BENEFITS

- Designed to track and organize the flow of information resources between AFMC Data Systems
- Empowers enterprise-level data management and architecture analysis
- Provides a standardized AFMC data dictionary with supporting metadata and references
- Supports research and modernization efforts for legacy system interfaces
- Supports the Log IT Change Control Process (CCP)
- Acts as a repository for over 2,000 current ICDs, containing over 10,000 data records involving 184 different interface partners
- Acts as a repository for over 5,000 historical ICDs dating back to 1985

DMAPS is an independent suite of depot maintenance software applications that support operations at WR-ALC (Warner Robins AFB), OC-ALC (Tinker AFB), OO-ALC (Hill AFB) and Kadena AB, Japan.

BCAT: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Ogden, Oklahoma City and Warner-Robins Air Logistics Complexes and PMO users located at Wright-Patterson AFB

Current Contractor/Contract Type: Alaska NorthStar Resources (ANR)/T&M

System Type: Client-server, Web-based

Number of Users: TAA/IE – 27,519

Subsystems:

- Time and Attendance (TAA) – Provides standard, automated means of collecting and reporting labor to financial, payroll and production at the task level
- Integration Engine (IE) – Collects, moves, translates and stores information between legacy systems, DMAPS and DFAS systems

WARFIGHTER BENEFITS

- Supports the organic depot maintenance production, materiel and financial processes
- Captures actual and planned direct labor and direct materiel at the task level
- Provides the ability to view production costs (direct labor, direct materiel, applied overhead and G&A) at the task level on a daily basis
- Provide functional testing capability to DFAS owned ABOM, NIMMS, and DIFMS (DNA) systems

DMLS is a family of independent depot and field maintenance software applications supporting operations at WR-ALC (Robins AFB), OC-ALC (Tinker AFB), OO-ALC (Hill AFB) and across the Air Force enterprise. DMLS enables the manufacture and overhaul of operational weapon systems parts and aircraft to ensure maximum warfighter mission capability.

- **Modern Aircraft Maintenance Production/Compression Report (AMREP)** – Plans and tracks inventory, personnel, and schedules for flight line, base and depot-level maintenance actions; maintains depot maintenance status of aircraft and maintainers that execute it
- **Depot Maintenance Workload Planning and Control System (DMWPCS)** – Tracks results of workload and manpower planning activities
- **Information Systems Management Tool (ISMT)** – Tracks information system user and functional owner requirements, and trouble reports

BCAT: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Depot users at Ogden, Oklahoma City and Warner Robins Air Logistics Complexes, and AFMC Headquarters and PMO users at Wright-Patterson AFB; Flightline and back-shop personnel, enterprise systems, depot and field maintenance scheduler users

Current Contractor/Contract Type: DNI Emerging Technologies, LLC/FFP, plus 309 SWEG (Organic) on AMREP

System Type: Client-server, Web-based/Cloud

Number of Users: ~54,578

Subsystems: N/A

WARFIGHTER BENEFITS

Supports workload requirements analysis to forecast, plan and schedule maintenance activities using:

- Inventory control
- Labor standards for production costing
- Bill of Materiel (BOM) management
- Job Order Number (JON) creation
- End Item asset availability
- Tracks information system functional owner requirements, and trouble reports
- Nuclear Deterrence
- Command and Control
- Rapid Global Mobility

DEPOT MAINTENANCE SYSTEMS INTEGRATION (DMSI) GB4

DMSI is a suite of integrated applications that manage materiel standards, production/issue history, Bill of Materiel (BOM) standard data, labor standards for maintenance planning and production costing, facilities planning, tracking, schedule execution and performance measurement activities for programmed/un-programmed depot maintenance workload, tracks end items/subassemblies through the maintenance overhaul line and provides a repository for storing production number master records.

BCAT: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Ogden, Oklahoma City, Warner Robbins ALCs, Kadena AB, WPAFB

Current Contractor/Contract Type: DNI, LLC/FFP, Empower AI, Inc/FFP, Robbins-Gioia/FFP

System Type: Client-server, Web-based

Number of Users: 12,829

Subsystems:

- AFMC Labor Standards Data System (ALSDS)
- Depot Maintenance Materiel Support System (DMMSS)
- Depot Maintenance Consolidated Operational Database (DMCDB)
- Exchangeable Production System (EPS)
- Inventory Tracking System (ITS)
- Job Order Production Master System (JOPMS)
- Programmed Depot Maintenance Scheduling System (PDMSS)
- Spectrum Systems Development Architecture (SSDA) – Common services framework

WARFIGHTER BENEFITS

- Provides Combatant Commanders full integration capability of data across functional lines
- Aircraft Maintenance efficiency improvements by optimizing planning and scheduling
- Establishes and maintains labor standards for maintenance planning and production costing
- Identifies materiel that must be pre-positioned to support maintenance workloads
- Depot Maintenance information on scheduling, materiel support and transactions
- A repository for storing the production number master records

DSOR AMS is a management decision support tool used to assign and document depot level workloads and Source of Repair. DSOR Process Workflows include Pre-Source of Repair Assignment (Pre- SORA), SORA, Core and Candidate Determination, Depot Maintenance Interservice (Department of War [DoW] Joint Process), Depot Activation, Periodic Review, Tracker, and Metrics. DSOR AMS supports Air Force compliance with Title 10 by documenting and providing an audit trail of the DSOR Decision for the life of the system.

- **DSOR AMS and Depot Maintenance Interservice Support Agreement (DMISA)**

Management Application (DMA) - COTS (MS SharePoint), No Code, Low-Cost Solution, Rapid Prototyping and Customization

- **DMA** - is a DMISA Management and Execution Tool for the AF, other DoW Services and Federal agencies supporting the establishment, management, execution and approval of AF DMISA documentation. The DMA establishes a standardized DoW DMISA repeatable process.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: HQ AFMC/A4FD

Current Contractor/Contract Type: Stellar/FFP

System Type: Hosted on DAF365

Number of Users: 2,623

Subsystems: N/A

WARFIGHTER BENEFITS

- **DSOR AMS:** Provides AFMC depot maintenance decisions support
 - Streamlines the review and approval of SORA requests
 - Coordinates depot decision with other DoW Services
 - Improves the timeliness of the depot maintenance process
 - Automates metrics reporting to senior management
 - Provides audit trail for DSOR decision for life of the system
- **DMA:** Streamlines AF DMISA reviews and approval documentation
 - Provides visibility of DMISAs across OSD, AF and other DoW Services
 - Automated metric reporting
 - Increased process efficiencies and decreased duplication
 - Standardized repeatable process across the Services
 - Available capacity to support other Federal Agencies

The EESOH-MIS application is a comprehensive Air Force owned joint enterprise Defense Business System used to monitor hazardous material usage, hazardous waste disposal, environmental restoration project compliance, and environmental program reporting to Congress, for the AF Environmental, Safety and Occupational Health (ESOH) communities. EESOH-MIS is an enterprise system providing capabilities across five major user functional areas: Hazardous Materials (HazMat/HM), Hazardous Waste (HazWaste/HW), Environmental Restoration (Cleanup/CU), Environmental Reporting (ER) and Ranges (RA). EESOH-MIS also consists of three minor functional areas: Safety Data Sheets (SDS) Search, a stand-alone web application for the whole user community to search for SDS documents; the Adhoc Reporting Tool (ART) which provides data sources for users to create their own reports; and an Automatic Identification Technology (AIT) inventory and audit application used in the depots for current inventory scanning.

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: AFCEC (EQ), AFCEC (ERA), Coast Guard (ALC)

Primary Customers: (Joint) AF Civil Engineering Center (AFCEC), and USCG, and DLA

Current Contractor/Contract Type: Obsidian Global, LLC/FFP

System Type: Interactive web app hosted on Cloud One (C1) Amazon Web Services (AWS)

Number of Users: 15,800+

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides Centralized Management/Accountability:
 - CE FOA/HAF effectively track/report on HazMat, HazWaste, Range Assessment, and Restoration (Cleanup) programs to maintain regulatory compliance
 - Supports base-level tracking and reporting for day-to-day management and reporting compliance; facilitates trend analysis and eliminates duplicate efforts
- Provides Data Standardization:
 - Real-time data visibility; facilitates Data Rollups and Data Calls
- Provides Data Quality:
 - Single repository for data standards; reduces errors
- Saves time and money:
 - Standardization of environmental processes (Playbooks)

ETIMS is the AF Defense Business System (DBS) for managing Technical Orders (TO) and Computer Program Identification Numbers (CPIN); managing TO/CPIN Accounts; managing TO/CPIN distribution and printing of paper TOs; and managing, storing, distributing, and viewing electronic TOs (eTOs). The overall ETIMS Enterprise Capability is provided by four (4) major systems: eTO Content Management (ECM) component, Defense Logistics Agency (DLA) Document Services, Cloud One and ETIMS software. ETIMS enables a fully integrated eTO capability to view and use eTOs at the point of use, a fully integrated print on demand service through DLA, and AF TO library currency and accuracy. ETIMS leverages existing Cloud One services, provides the ECM functionality, and DLA Document Services printing service for on-demand paper TO printing. Details of the functional requirements can be found in the ETIMS System Requirements Document (SRD). Through its ECM component, ETIMS provides a combination of services and capabilities to support eTO distribution and viewing. ETIMS provides the permissions for eTO access to the ECM component which supports eTO distribution to ETIMS Client devices. The ECM component of ETIMS is a major step toward the AF Technical Order (TO) Concept of Operations (CONOPS): "to provide user friendly, technically accurate, and up-to- date digital technical data at the point of use that is acquired, sustained, distributed and available in digital format from a single point of access for all technical data users.

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Flightline and Back-shop Maintenance Personnel, Operations Personnel, MAJCOMs, ALCs and Product Centers

Current Contractor/Contract Type: KIRA/FFP/CPFF

System Type: Web-based, Client-server, PC Software

Number of Users: 180,000+

Subsystems: N/A

WARFIGHTER BENEFITS

- Real-time, web-based, single point of access to electronic Technical Orders (eTOs)
- TO updates in real-time for connected ops
- eTool capability (TOs on laptops and iPads) for "point-of-use" access to eTOs (disconnected ops) in support of both Windows and iOS-based devices
- Automated overnight refresh of eTools
- Controlled access to eTOs to authorized users
- Manage configuration of eTOs
- Real-time web-based management of TO/CPIN
- Print on demand eliminates inventory/warehouse space, reduces shipping costs by up to 75 percent and reduces shipping time from weeks to days

FEM provides depots real-time visibility of facilities and equipment assets including data for installation, relocation, modification, maintenance and repair. The FEM System delivers an automated tracking and control system for managing facilities and equipment including emergency, corrective and preventative maintenance, project planning, equipment calibration, equipment maintenance contracts, inventory control, bar-coding capabilities, purchasing, costing for equipment, material and labor and equipment dispatches/moves.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Ogden-Hill, Oklahoma City-Tinker, and Warner Robins Air Logistics Complexes

Current Contractor/Contract Type: Zigabyte and Citizant/FFP

System Type: Web-based IBM Maximo COTS product built with a GOTS overlay

Number of Users: 3,548

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides tracking of five asset management functional areas integrated into single database structure – Industrial Plant Equipment, Owner Maintenance, Metrology, Ground Support Equipment (GSE) and Tool Management tracking for 1,054,291 items (158,216 assets, 278,579 tools and 617,496 inventory items)
- Tracks Organic work managing complete business process to include recall, tracking asset thru Lab, capturing work performed (technician, hours, parts, standards, etc.) and shipment
- Quality Module provides for both In-Process Reviews (IPR) and Quality Process Reviews (QPR)
- Manages all work done on IPE (demand maintenance, Periodic Maintenance (PM) and large projects)
- Supports both maintenance and movement of GSE, positioning of GSE at aircraft and provides Q/A functionality for contractor work
- Manages all work done on OM assets (demand maintenance and PMs)
- Supports inventory management (stocking, re-stocking, etc. of bulk, special, unique, consumable and safety tools) as well as operations of tool cribs (issuing, exchanges, tracking, etc.)
- Provides kitting functionality – templates and tool kits integrated with Metrology – ensures Test, Measurement and Diagnostic Equipment (TMDE) tools are tracked and calibrated on schedule

FMxC2 is the maintenance information system of record for 1,189 Mobility Air Force (MAF) aircraft, supporting 32,000+ users. The global reach of FMxC2 provides aircraft information at main operating bases, enroute, and at deployed locations, to provide field level and Major Command (MAJCOM) aircraft managers an enterprise view in the decision-making process. The application provides worldwide Logistics Command and Control information on aircraft status with Estimated Time In Commission (ETIC), location, capability, and availability of all FMxC2 managed aircraft assigned to using commands. This management and visibility are in a single view and provides the same information from the airman on the flightline to MAJCOM commanders. The system accumulates, validates, processes, stores, and makes accessible to Air Force and fleet managers the data necessary to keep aircraft combat-ready and safe to perform all missions. FMxC2 provides logistics command and control data to managers at all levels with the status, location, configuration, availability, and capability of aircraft assets. This data provides maintainers and command and control authorities, critical data to assess and maintain aircraft Safety of Flight.

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Flightline and Back-shop Maintenance Personnel **Current Contractor/Contract**

Type: Citizant/FFP

System Type: Web-based

Number of Users: 32,000

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides accurate and timely information about aircraft and critical support equipment status, location, availability, and capability, allowing decision makers to allocate, plan, track, and execute the aircraft for every MAF global mission.
- Provides weapon systems and components tracking to accurately determine constraints, remaining service-life, configuration, et cetera.
- Provides for the collection of weapon system flying hours, operating time, and other metrics to determine cost-effectiveness and service-life of weapon systems and associated sub-systems

FIRE AND EMERGENCY SERVICES – INFORMATION MANAGEMENT SYSTEM GB4 (FES-IMS)

FES-IMS empowers Air Force Firefighters with the read-time data and critical resources for rapid, effective emergency response – anytime, anywhere. Among its core functions, FES-IMS helps dispatch crews to emergencies, schedules firefighter shifts, tracks/documents training, records fire prevention and compliance data, facilitates resource organization and provides response vehicle fleet management tools. FES-IMS creates efficiencies in daily operations, facilitates contingency deployments and streamlines 9-1-1 calls as the Public Safety Answering Point (PSAP). FES-IMS is the critical link to National Fire Incident Reporting System (NFIRS) reporting and the imminent National Emergency Response Information System (FERIS) platform transition in 2026. This interoperable system supports operations at fixed bases and deployed locations, enabling a coordinated and efficient response to emergencies in any environment, anywhere and anytime. FES-IMS is essential for maintaining readiness while ensuring the safety and security of Air Force people, property, and mission accomplishment.

BCAT Level: BCAT III

Current Contractor/Contract Type: IPT-Exter/FFP

System Type: Web

app hosted on Cloud

One / Desktop

Dispatch Client

Number of

Users: 6,000+

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides emergency dispatch services for crash, medical, and structural incidents with proper assets and personnel
- Provides after action incident reports to a DoW database hosted by the Federal Emergency Management Agency (FEMA) and the U.S. Fire Administration for service wide and country wide analysis
- Provides fire suppression foam tracking capability, allowing the Air Force to track foam exposure by recording spills, suppression activities, quantities and types of foam agents

G

FOUNDATIONAL LOGISTICS INFORMATION TECHNOLOGY ENTERPRISE SYSTEM (FLITES) GB4

FLITES is the official authoritative data source of the Air Force item management for federal cataloging and is on track to be for provisioning and selected logistics information. Once fully implemented, FLITES data will enable systems and users to uniquely identify, categorize, fund, purchase, requisition, store, transport, repair, reclaim and dispose of items used and managed by the AF.

Item Standardization and Item Configuration Management - Standardized Item management enables improved demand forecasting, economies of scale purchasing, and total asset visibility as summarized below.

Item Standardization - Provides the standardization and transformation of Item cataloging and provisioning processes, structure, and content for all applicable Item types.

Item Configuration Management - Provides consistency of Item product structure, attributes, propagation, and standardized views through a single organization comprised of logistics enterprise experts, and coordinates Item changes with all affected AF Logistics stakeholders.

Item Authoritative Source - Provides a single authoritative Item record to the AF logistics enterprise and allows for enhancement of the Item record (new attributes).

BCAT Level: BCAT II

BCAC Phase: Acquisition, Testing & Deployment

Resource Provider: AFMC/A4N

Primary Customer: AFSC, AFLCMC

Current Contractor/Contract Type: One Network/IDIQ/FFP

System Type: Web-based hosted in AWS Cloud One Initiative

Number of Users: 8,000

Subsystems: N/A

WARFIGHTER BENEFITS

- Providing a single source of truth for foundational Item data to all users – Managed at the enterprise view, ensuring the “Logistics tail” is consistent for all stakeholders
- Enhanced Provisioning – Integrating the Technical and Logistics Baseline
- Standardized Cataloging ensures the data integrity entering AF Log and Defense Logistics Agency Log Information Services
- Standardize/Configuration Manage Log Management Info (LMI) the combination of Technical Product Structures and Management Data. LMI incorporates all Item Types, associating multiple Item Types to deliver enhanced data capability to meet Transformation and Compliance reporting
- Provides AF Logistics Nation (AF Log Nation) with a Common Operating Picture; ensuring integrated data across all communities and applications. Eliminates disparate and discrepant data at the point of execution, enhancing Planning, Maintenance (Mx), Engineering, and Supply Chain Management (SCM)

GEOMAP is an Air Force (AF) capabilities-based support environment that utilizes an Automated Information System (AIS) application. GEOMAP enables accurate decision making by providing a Geographic Information System (GIS) that represents real-world features and conditions for AF installations, ranges, and property by depicting real objects such as runways, buildings, etc., as digital maps.

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: Air Force Civil Engineering Center

Primary Customer: AF Civil Engineering squadrons across Active Duty, Guard, and Reserve

Current Contractor/Contract Type: Solutions 71/FFP

System Type: Web application hosted on

Cloud One (C-1) Amazon Web Services
(AWS)

Number of Users: 22,000+

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides a single point of discovery for AF Installation Geospatial Information and Services (IGI&S), increasing Commanders' situational awareness to visualize mission information assets and reduce decision risk.
- The web-based authoritative locational data enabling geospatial representations of Air Force-built and natural infrastructure for the Air Force Civil Engineering community.
- Offers an online environment for sharing geospatial analysis and visualizations in a controlled and collaborative manner for installation, Air Force Civil Engineer Center (AFCEC), and Air Force Installation and Mission Support Center (AFIMSC) personnel.
- Hosts CE tools leveraging geospatial capabilities, including support for force bed-down, expeditionary base site selection, airfield waivers/obstructions, environmental areas of concern, base emergency response, etc.
- Supports force readiness by ensuring consistent installation of geospatial data creation, maintenance, and mapping capabilities across the enterprise, enabling personnel to capitalize on common IGI&S capabilities.

ILS-S is a Defense Business System (DBS) that provides IT capability in the functional area of USAF base-level supply/materiel management. The ILS-S is a core persistent USAF logistics capability and also a financial data feeder system. ILS-S capabilities includes ordering, receiving, storage, distribution, tracking, disposition and movement of supplies, organizational account management, weapon system spares support, asset depreciation and reporting, cataloging, computing stock levels, mobility, allowance and authorization management, warranty management, financial reporting, inventory control point, supply point, contractor- provided weapon system support, aircraft, engine and missile maintenance, hazardous material management, communications security management and mobile technology.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Active duty, Guard and Reserve forces

Current Contractor/Contract Type: Obsidian Global LLC /FFP/CR, Absolute Strategic Technologies/FFP/CR

System Type: Web-based

Number of Users: 18,000

Subsystems:

- Enterprise Solution-Supply (ES-S) modern web-based hosted in AWS GovCloud Cloud One (C1)
- Modernized Standard Base Supply System (SBSS) modern transactional-based ILS-S System of Record hosted in AWS GovCloud C1
- Wrapper Adapter Layer (WAL) modern interface middleware & routing component hosted in DISA DECC Montgomery
- ILS-S Mobile (ILSSM) modern mobile

WARFIGHTER BENEFITS

- Provides direct supply support to Active, Guard and Reserve forces anywhere in the world in support of peacetime and wartime operations
- Provides logistics enterprise capabilities, enterprise query order/asset visibility and enterprise high-priority order management, Mission Capable (MICAP) Management, Serialized Tracking Nuclear Weapons Related Materiel (NWRM), Mobility, Chemical - Biological, Radiological & Nuclear (CBRN)

Per AF policy, IMCS is the official authoritative source of the AF item management, federal cataloging, provisioning and selected logistics information for the AF. IMCS is the foundation upon which many other AF Materiel Command (AFMC) systems rely. IMCS distributes updates of item management information for provisioning, cataloging, and supply functions to the other logistics systems throughout the Air Force and other services.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: ALC users, Catalog Agents, Item Managers, Equipment Specialists, Supply Techs

Current Contractor/Contract Type: DNI Emerging Technologies/FFP

System Type: Mainframe

Number of Users: 6,000

Subsystems: IMCS is a suite of 10 applications

- Master Item Identification Control System (MIICS) D043
- Suspense and Control System (SACS) D036
- Master Item Identification Database System (MIIDB) D043A
- Interchangeability and Substitution Suspense System (I&SSS) D043B
- Base Account Screening Exercise System (BASES) D046
- Stock Number User Directory (SNUD) D071
- Mission Workload Assignment System (MWAS) D086
- AF/FLIS Edit and Routing System (AFERS) D143C
- Preliminary Item Entry Control System (PIECS) D155
- Supply Support Request Advice - Consumable Items (SSRAC) D169
- AF Materiel Command Provisioning System (AFPS) D220

WARFIGHTER BENEFITS

- Entry point for provisioning spare and repair parts for the weapon system
- Provides Air Force interface updates to the Federal Catalog System (FCS)
- Processes Supply Support Requests (SSRs) and related advice for consumable items coded for DLA, GSA and other military services support
- Determines the range and quantity of spare/repair parts necessary to support the equipment for an initial operational support period

IMDS Operational Systems (OS) is a family of systems comprised of Integrated Maintenance Data Systems (IMDS) Central Data Base (CDB), IMDS Web Services (WS), and IMDS Maintenance Scheduling Module (MSM). IMDS CDB is an Azure Cloud-based AF enterprise-level field maintenance automated management information system for multiple types of weapons systems. It provides virtual access to centralized maintenance data for effective and efficient management of weapons systems maintenance worldwide. IMDS WS allows for the exchange of data between IMDS CBD and partner systems. MSM is an automated system that provides Aircraft Schedulers and Maintenance Managers with aircraft scheduled maintenance information they need to make critical decisions in meeting the rigorous and challenging mission requirements facing AF leaders.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Flightline and Back-shop Maintenance Personnel **Current**

Contractor/Contract Type: Citizant/FFP, Zigabyte/FFP **System Type:** Web-based

Number of Users: 284,424

Subsystems: N/A

WARFIGHTER BENEFITS

IMDS-CDB/WS

- Provides wartime readiness and operational support of aircraft, trainers, simulators, comm-electronics, missiles, ICBMs, Mine Resistant Ambush Protected (MRAP) vehicles, personnel training management and support equipment maintenance activities at worldwide operating bases, ANG and AFRC
- Automates weapon systems lifecycle management and history, including maintenance scheduling and air crew debriefing processes, providing a common interactive interface for entering and retrieving field-level maintenance data for other logistics management systems
- Provides additional maintenance scheduling tools and data analysis capabilities for data in IMDS CDB, Reliability and Maintainability Information System (REMIS), and the Comprehensive Engine Management System (CEMS)
- Manages a tool for analyzing maintenance records, identifying and correcting anomalies, and creating maintenance schedules
- Monitors real-time updates to data in the IMDS CDB

JDRS is the single authoritative source for joint aviation warfighter deficiency reporting. It is the single source to notify stakeholders, guide support team investigations and responses, compile investigative data, report problem resolution and prevent recurrence. JDRS is a web-based automated system hosted and maintained by Naval Air Systems Command (NAVAIR) designed to initiate, process, and track Deficiency Reports (DRs), from submission throughout the investigation process.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4

Primary Customer: HQ AFMC (incl. Program Offices, Supply Chain Squadrons, and Depot Maintenance Units), Navy, Coast Guard

Current Contractor/Contract Type: Alaska Northstar Resources /FFP

System Type: Web-based

Number of Users: 3,700+

Subsystems: N/A

WARFIGHTER BENEFITS

- Maintains visibility over the AF Deficiency Reporting, Investigation, and Resolution (DRI&R) process, to enable and analyze metrics that improve quality of products and mission readiness
- Increases warfighter capability by being the single source to track reported DRs
- Automates routing of DRs
- Provides seamless, standard deficiency reporting workflow tool used across the US Armed Forces

Capability Delivery Manager:

Mr. Mark Baker
937-307-0545

MARKS is a Cloud One Azure mission application used at 119 sites to capture, route, manage, share and store information essential to supporting the management and tracking of household goods (HHG) shipments and storage processed through Joint Personal Property Shipping Offices (JPPSOs) at Hanscom AFB, Joint Base San Antonio (JBSA), Colorado Springs, Joint Base Elmendorf-Richardson (JBER), and 100+ base-level Personal Property Processing Offices (PPPOs) and Personal Property Shipping Offices (PPSOs). MARKS is comprised of four Subsystems: Consolidated Personal Property Portal (CPPPo), which is web-based; MicroFocus Content Manager (MFCM), which is thick-client software; Excess Cost Adjudication Function Information System (ECAFIS), which is web-based; and Archive which is also web-based application.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: USAF and DoW Personal Property Movements Technicians

Current Contractor/Contract Type: Ignite Fueling Innovation, Inc./FFP

System Type: Web-based and thick-client hosted in Cloud One Azure

Numbers of Users: 1,029

Subsystems:

- Consolidated Personal Property Portal (CPPPo)
- Micro Focus Content Manager (MFCM)
- Excess Cost Adjudication Function Information System (ECAFIS)
- Archive

WARFIGHTER BENEFITS

- Enables military and civilian personnel to coordinate, manage and track an average of 240,000 annual personal property shipments
- Receives, tracks and stores all documentation related to the shipment and storage of HHG
- Greatly improves identification of excess cost cases per year, facilitating government recoupment of \$2M+ in overpayments annually
- Provides lifecycle storage and tracking of over 14M documents (average 1.8M new documents per year) in accordance with disposition schedules
- Archive consists of 10+ years of HHG shipment documentation when the four JPPSO databases were consolidated for MARKS v10.0 (previously known as ONBASE) and is accessible by all MARKS users

MRO is a Doctrine, Organization, Training, Materiel, Leadership and Education, Personnel, Facilities, and Policy (DOTMLPF-P) transformation and standardization of both the business processes and enabling materiel solution. MRO will provide the Air Force Sustainment Center (AFSC) with an integrated capability for planning, scheduling, and executing organic depot maintenance and supply while capturing costs at the point of transaction. MRO will support agile planning, optimized workload assignment, resource allocation, quality assurance, with maintenance and supply driven Department of the Air Force Working Capital Fund (DAF WCF) financials auditability. This integrated capability, by definition, represents a critical step forward toward resolution of the Air Force's Integrated Financial Systems Materiel Weakness. MRO will implement a configured Oracle E-Business Suite (EBS) commercial off-the-shelf (COTS) software product with required report, interface, conversion, extension, and workflow (RICE-W) objects. MRO operates within the .mil network via the Oracle Cloud Infrastructure (OCI) environment, is a web-enabled system, and will support approximately 30,000 users as it is deployed through a series of incremental software builds under an Agile software development program. MRO will implement throughout all AFSC product lines to include commodities, electronics, missile, propulsion, aircraft, software, and maintenance support groups and supporting organizations such as Defense Finance and Accounting Service (DFAS). MRO will provide the standard enterprise business capabilities required to accomplish AFSC's desired business outcomes. Implementing these business capabilities will enable AFSC to reduce flow days, improve throughout, increase on time delivery, and improve aircraft availability resulting in increased support to the warfighter and provide increased auditability and financial reporting integrity.

BCAT Level: BCAT I

BCAC Phase: Acquisition, Testing, and Deployment

Resource Provider: HQ AFMC/FM DAF WCF, AFSC/A6/FMR

Primary Customer: AFSC & HQ AFMC/FM (DAF WCF)

Current Contractor/Contract Type: Accenture Federal Services, LLC/FFP, CPFF

System Type: Web-based, using Oracle Cloud Infrastructure (OCI)

Number of Users: ~30,000 across the Air Force Sustainment Center (AFSC) and other stakeholders (phased in during FY25-FY30)

Subsystems: N/A

WARFIGHTER BENEFITS

- Single AFSC enterprise solution to plan, schedule, and execute Maintenance and Supply
- Integrates capture of auditable financial transactions at point of work for DAF WCF management
- Critical for DAF WCF Financial Improvement and Audit Readiness (FIAR), Standard Financial Information Structure (SFIS), and Material Weakness resolution and audit readiness
- Streamlined and standardized depot maintenance and supply operations to ensure weapon system readiness in peacetime and sustainment for contingency operations and combat forces in wartime
- Enables AFSC optimization of resource and workload allocation
- One depot-level system for weapon system customers (sunsets 17 Mx and 8 Supply legacy systems)

OLVIMS is a Cloud One AWS logistics readiness mission application used at 238 US Air Force (USAF) Active Duty, US Space Force (USSF) Active Duty, Air National Guard and AF Reserve installations. OLVIMS is used by ground transportation personnel to manage transportation requests, dispatch vehicles and manage driver use. The application is also used to issue and track AF Motor Vehicle Operator Identification Cards (driver licenses) and Driver Records which includes vehicle qualifications, restrictions, certifications (i.e., Commercial Drivers License (CDL) certifications), and traffic violations.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: USAF Ground Transportation Community

Current Contractor/Contract Type: Ignite Fueling Innovation, Inc./FFP

System Type: Web-based system hosted in Cloud One AWS

Numbers of Users: 2,983

Subsystems: N/A

WARFIGHTER BENEFITS

- Effectively dispatches and manages usage of more than 20,000 vehicles and over 6,000 Ground Transportation professional operators in support of base-level missions
- Efficiently issues and manages more than 360,000 vehicle operator licenses and driver records with more than 2.47M user vehicle qualifications tracked and reported
- Provides authoritative data on vehicle fleet usage, driver qualifications and readiness
- Automates the process for local Vehicle Control Officials (VCOs) to request ground transportation support
- Automates the process to effectively schedule both vehicle dispatches and maintenance activities

PRECISION MEASUREMENT EQUIPMENT LABORATORY AUTOMATED MANAGEMENT SYSTEM (PAMS) GB4

PAMS is the sole repository and single-entry point for the overall collection, tracking and retrieval of maintenance and quality assurance data of over 1.7M items of Test, Measurement and Diagnostic Equipment (TMDE). PAMS provides Total Asset Visibility (TAV) and Decision Support Tools (DSTs) to assist AF Metrology and Calibration (AFMETCAL) in effectively and efficiently accomplishing the mission of certifying TMDE for aircraft maintainers and other support activities. PAMS application is accessible 24/7 via AF Cloud One (C1) Amazon Web Services (AWS).

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Support AFMETCAL and the PMEL Community **Current**

Contractor/Contract Type: Citizant/FFP, Zigabyte/FFP **System Type:** CloudOne

Number of Users: 6,700

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides inventory management for work-centers
- Schedules and MDC tracks for TMDE items
- Quality program tools for random selection and documentation
- Shipping and supply tracking and management
- Enables the PMEL force to maintain CONUS and OCONUS TMDE missions which are vital to all AF peace-time and contingency operations

G

PRPS automates the front-end of the Buy and Repair acquisition process with a web-based, paperless link to contracting. PRPS performs competition screening and generates electronic Purchase Requests (PRs), Military Interdepartmental Purchase Requests (MIPRs) and Delivery Order Requests (DORs) including the appropriate attachments. The system obtains funding certification in support of the acquisition process via an automated interface, tracks lead time and produces item history.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF Sustainment Center (AFSC), Engineers, Equipment Managers, Item Managers, Production Management Specialists, Capability Delivery Managers and many others involved with the purchase of spares and repairs of stock listed repairable items for the USAF

Current Contractor/Contract Type: Obsidian Global/CPFF/FFP

System Type: Web-based system hosted in Cloud One AWS

Number of Users: 2,721

Subsystems: N/A

WARFIGHTER BENEFITS

- Reduces lead-time, minimizes errors and provides more efficient expenditure of resources in the Purchase Instrument (PI) preparation process in order to provide timelier pipeline flow
- Provides AFMC continuous visibility of the PI from requirement initiation through the financial certification to contracting and provides a repository of procurement actions and part screening to enable savings and efficiencies for strategic contracting

RELIABILITY, AVAILABILITY, and MAINTAINABILITY for PODS (RAMPOD) GB4

RAMPOD provides serialized asset tracking to collect, process, collate, validate, report, and archive reliability, availability, maintainability, configuration, inventory, status, performance (sortie/mission), maintenance and warranty data for Pods and Integrated Systems through web-based applications. RAMPOD is designated as a critical Financial Feeder System to the Defense Finance and Accounting Service (DFAS).

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF, Army, Navy, DoW and Contractors

Current Contractor/Contract Type: S&K Mission Support, LLC/FFP

System Type: Web-based, Oracle database

Numbers of Users: ~2,400

Subsystems:

- Global Eye
- Harm Targeting System (HTS)
- Pod Asset Reporting System (PARS) / Interface for Messaging Pod Updates of Location and Status (IMPULS)
- RAMPOD Collection Software (RCS)
- RAMPOD Inventory Maintenance System Software (RIMSS)
- CFO (eBusiness R12), Consolidated User Administration (CUA), Equipment Tracker, Maintenance Extraction Tool (MET), RAMPOD Login (RampLogin), RAMPOD Portal, Security Module, User Monitor
- Reports
- ReportsGen2

WARFIGHTER BENEFITS

- Single on-line repository of data, capable of supporting all phases of total life cycle support of PODs
- Maintain on-line data for aircraft pods from acquisition to disposition for the Air Force, Army, Navy and DoW contractors
- Produce metrics and statistics based on operating time, and serialized tracking of fails
- Track all AF pods based on serial numbers, operational status and configuration
- Includes capabilities to track maintenance on specialized avionics Line Replaceable Units (LRUs) and associated Support Equipment (SE) for A-10, B-1B, B-2, F-15, F-16, F-35, and other Mission Design Series (MDSs)

REMIS is the AF Enterprise maintenance system providing real-time operational maintenance status on all AF aircraft and weapon systems combat readiness, availability, reliability, maintainability, trend analysis, failure prediction, utilization, Time Compliance Technical Order (TCTO) and configuration status of all AF weapon systems worldwide. Additionally, REMIS is a critical Chief Financial Officer (CFO) financial feeder system providing cost accounting and depreciation on all Air Force Aerospace Vehicles, Mine Resistant Ambush Protected (MRAP) vehicles pods and missiles including Intercontinental Ballistic Missiles (ICBMs). REMIS maintains and distributes Master Validation tables to Base, Depot and Weapon System applications enabling data integrity and standardization across the AF.

BCAT Level: BCAT II

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: Weapon System Program Offices, Base-level and MAJCOM Aerospace Vehicle Distribution Officers, Depot-level Maintainers, Original Equipment Manufacturers and Chief Financial Officers

Current Contractor/Contract Type: Innovative Management Concepts/FFP/LH

System Type: Web-based, Oracle database

Numbers of Users: 1,250

Subsystems:

- Equipment Inventory Multiple Status and Utilization Reporting Subsystem (EIMSURS)
- Generic Configuration Status Accounting Subsystem (GCSAS)
- Product Performance Subsystem (PPS)
- CORE

WARFIGHTER BENEFITS

- Provides status of a weapon systems ability to perform assigned missions
- Improves weapon system performance
- Delivers fleet status, total asset visibility and cradle-to-grave information tracking across the entire Air Force Maintenance Enterprise
- Manages all AF weapon system configurations, TCTO status, Time Change & Inspection (TCI), inspection and serialized component inventory
- Supports worldwide customers data requirements, with accurate maintenance data, at all levels including Congress, DoW, HAF, MAJCOMs, AF, DFAS, Navy and Original Equipment Manufacturers

RMS is used to forecast/determine, budget, and procure the range and depth of aircraft spare parts requirements based on aircraft and depot maintenance usage and readiness and sustainability goals. RMS supports the warfighter by computing procurement requirements for spares and determining depot level maintenance repair needs for the AF. RMS encompasses the automated and manual functions involved in the materiel requirements process.

This process forecasts and controls procurement and repair requirements of materiel needed for logistics support of AF operated weapon systems. The warfighter aircraft maintainer benefits by having availability of the correct mix of spare parts to satisfy planned weapon system quantities and capabilities. The materiel involved is in direct support of the AF weapon systems and has a significant impact on the AF's ability to carry out its mission. RMS addresses the AFMC top-level Mission Essential Tasks and Objectives of Supply Management: "Provide and deliver repairable and consumable items (right product – right place – right time – right price)."

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: ALCs, DLA and AFSPC — Item Managers, Equipment Specialists, Production Management Specialists

Current Contractor/Contract Type: Inalab Consulting Inc/FFP

System Type: Mainframe (D200 suite)

Number of Users: 335

Subsystems: N/A

WARFIGHTER BENEFITS

- RMS processes approximately 89,000 national stock numbers in meeting Air Force warfighter spares requirements and depot level maintenance needs
- Forecasts and controls procurement and repair requirements of materiel needed for logistics support of weapon systems
- RMS is a planning engine that works in the background to track needs, project requirements, and serve the Air Logistics Complex (ALC) planning processes

SCS, Data System Designator (DSD) D035, is an AF managed program providing Automated Data Processing (ADP) resources for Headquarters operations and supporting Logistics Centers. It provides enhanced processing of stock control transactions and management information. SCS also provides financial operations for the ALC's supply operation through its Financial Inventory Accounting and Billing System (FIABS) sub-system.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N and AFMC/FM

Primary Customer: Retail Supply, Supply Systems Analysts, Item Managers, Financial Managers, Financial Analysts, Packaging Specialists, Shipment Clerks, Disposal Specialists, Supply Clerks, Reclamation Clerks and Wholesale Supply

Current Contractor/Contract Type: Obsidian Global LLC /CPFF/FFP

System Type: Mainframe and Mid-Tier

Numbers of Users: 15,000

Subsystems:

- Item Manager Wholesale Requisition Process (IMWRP) (D035A), Wholesale Management and Efficiency Report (WMER) (D035B), Reportable Asset Management Process (RAMP) (D035C)
- Special Support Stock Control (SSSC) (D035D), Readiness Based Leveling (RBL) (D035E)
- Reutilization and Disposition System (RDS) (D035G), Financial Inventory Accounting and Billing System (FIABS) (D035J) , Wholesale and Retail Receiving and Shipping (WARRS) (D035K)
- Inventory and Storage Process (INSTOR) (D035L), Shipping Information System (SIS) (D035T)

WARFIGHTER BENEFITS

- Benefits the warfighter by automating supply management providing current asset visibility, maintaining asset balances, processing requisitions and provides financial operations for supply operations

SPERS is a Depot Level Maintenance (DLM) requirements and budget planning system. The system captures the unconstrained and constrained requirements in support of Air Force and Department of War processes. SPERS is the system of record for establishing and assigning Program Control Number (PCN) codes.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4F

Primary Customer: AF Enterprise, HAF, USSF, MAJCOMs, and all three AFLCMC ALCs

Current Contractor/Contract Type: 578 Flt E System Integrator (Organic)

System Type: Web-based/Cloud One Azure

Number of Users: 2,200

Subsystems: N/A

WARFIGHTER BENEFITS

- Displays a total force picture of customer requirements for Depot Level Maintenance through the Future Years Defense Program
- Is the system of record for establishing and assigning Program Control Number codes
- Manages the Logistics Requirements Determination Process to capture the unconstrained and constrained requirements of Weapon System Sustainment for the Air Force Program Objective Memorandum and Fiscal Year Execution Plan
- Supports HQ Air Force and SAF/FM in the generation of reports required for Office of the Secretary of Defense and Congressional budget exhibits
- Supports Air Force and DoW processes, initiatives, and reporting efforts to include: Other Funded Customer Order Workload Planning, Requirements Review and Depot Determination, Strategic Requirements Review, and Core

TMSS is a designated AF Standardization Management Activity (SMA) responsible for AF compliance with DoW Defense Standardization Program 4120.24-M. TMSS authors, sustains and validates standards and specifications used to develop most AF Technical Orders (TOs). TMSS provides acquisition support and digital tools to aid in the development of Technical Orders.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customer: AF Weapon System Program Offices, Technical Order Management Agents (TOMAs), and their development contractors

Current Contractor/Contract Type: Inserso, Inc./FFP

System Type: N/A (TMSS is an AF SMA, AF Code 16 non-program)

Number of Users: 174,000+

Subsystems: N/A

WARFIGHTER BENEFITS

- Standardizes development and delivery of paper and digital TOs
- Creates and maintains SGML/XML digital templates and tools based on AF TMSS
- Advises and assists weapon systems program offices in their acquisition of paper and digital TOs, including S1000D Business Rules
- Provides technical guidance on authoring and conversion of TOs
- Provides Help Desk services to TO developers AF-wide
- Performs technical assessments on TO source data to ensure compliance with specifications and standards
- Provides technical evaluation of the Technical Manual Contract Requirements (TMCR) for acquisition programs
- Supports development of TO Content Management Systems and Project Lifecycle Management Initiative (PLMi), as needed

WEAPON SYSTEM MANAGEMENT INFORMATION SYSTEMS (WSMIS) GB4

WSMIS is a suite of standard automated AF Decision and Operational Support Tools used to assess the logistics health and capability of AF weapon systems to meet wartime tasking's. WSMIS consists of four systems: Requirements/Execution Availability Logistics Module (REALM), Sustainability Assessment Module (SAM), Propulsion Requirements System (PRS), and Execution and Prioritization of Repairs Support System (EXPRESS).

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/A4N

Primary Customers: AF, AFMC, Major Commands (MAJCOMs), Air Logistics Complexes, Base Level Users, MAJCOM Engine Managers

Current Contractor/Contract Type: Concept Plus, LLC/FFP

System Type: Client-server, Web based system hosted in Cloud On Amazon Web Services (AWS)

Number of Users: 1,424

Subsystems:

- Execution and Prioritization of Repair Support System (EXPRESS)
- Sustainability Assessment Module (SAM)
- Propulsion Requirements System (PRS)
- Requirement/Execution Availability Logistics Module (REALM)

WARFIGHTER BENEFITS

- Provides ability to compute and assess wartime requirements (REALM and SAM)
- Corporate Data Base for Readiness Spares Packages and High Priority Mission Support Kits (REALM)
- Provides visibility into the Depot Repair processes (EXPRESS)
- Provides capability to compute spare engine levels and new engine requirements (PRS)

AIR FORCE MEDICAL OMNIBUS WEB APPLICATION POOL (AFMOWAP) GBB

The AFMOWAP system comprises a family of applications used by the Air Force medical community to manage information in direct support of active AF Air National Guard and the AF Reserves Units. Residing on the AF NIPRNet, the AFMOWAP applications are designed to use a flexible architecture tailored to meet a range of medical user needs.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC

Primary Customer: AFMEDCOM /SG3

Current Contractor/Contract Type: JYG Innovations, LLC/FFP

System Type: Web-based

Number of Users: 55,740

Subsystems:

- Aeromedical Information Management Waiver Tracking System (AIMWTS)
- Medical Planning and Programming Tool (MPPT)
- Physical Examination Processing Program (PEPP)
- Radioactive Materials Management Information System – Web (RAMMIS-W)

WARFIGHTER BENEFITS

- Manages and tracks flying waivers, physical examinations, exceptions to policy and the application and approval process for AF flying personnel, special operations and applicants for these duties
- Maintains Nuclear Regulatory Commission compliance in management of all licensed AF non-weaponized radioactive materials, generates permits and supports administrative functions
- Provides the AF Medical Service database capabilities to support the DoW Planning, Programming, Budgeting and Execution programming process

BaS&E Planning System supports the base support and expeditionary site planning processes by identifying resources and combat support requirements at planned and potential employment locations. It provides bed-down capability analysis, limiting factor identification, and facilitates force tailoring decisions. BaS&E captures all aspects of a site/location such as flight line, housing and transportation to determine which location can best support incoming forces based on tasking.

BCAT Level: N/A (NSS)

Resource Provider: HQ AF/A4IS

Primary Customer: HQ AF/A4LR

Current Contractor/Contract Type: 1SYNC Technologies/FFP (PMO Support), HTGS-CULMEN JV LLC [HUNATEK]/Labor Hour (Agile Development/Sustainment)

System Type: AWS Cloud-based (Cloud One IL5, IL6)

Number of Users: NIPR: 4,114; SIPR: 210

Subsystems: N/A

WARFIGHTER BENEFITS

- Integrated suite of web enabled site planning tools (modules)
- Enables and enhances the warfighters' combat capabilities supporting the AF Expeditionary Site Survey Planning (ESSP) process
- Delivers a process for campaign planning and COA analysis and selection, thus providing a more accurate and expedient identification of resources, as well as critical support requirements for potential bed down locations around the world
- Ensures a well-documented, de-conflicted and standardized approach towards bed down and reception support for tasked Operations Plans
- Allows for rapid capability and Limiting Factor (LIMFAC) identification and facilitates force tailoring decisions to reduce the deployment footprint
- Showcases full range of capabilities that are used for exercises, named operations, safe havens, and natural disaster events

CON-IT will replace aging (legacy) contract writing systems through Business Process Re-engineering (BPR), other non-materiel solutions, and an integrated set of tools, services, and capabilities supporting AF contracting in the end-to-end (E2E) procure-to-pay (P2P) business process. The consolidated set of tools will reduce the Information Technology (IT) footprint and save Operations and Support (O&S) costs, while also standardizing processes, improving data quality and security, and ensuring compliance with mandates applicable to contracting, auditability, and business information systems. CON-IT is currently being operated throughout the DAF Operational Contracting community while adding new users from the weapon systems and logistics contracting communities as we continue the steps necessary to sunset ConWrite by FY28 and the Automated Contract Preparation System (ACPS) by FY29.

CON-IT will support the global AF mission and will include operational, weapon systems, logistics, and Research and Development (R&D) contract actions, serving more than 9,600 AF personnel. CON-IT will address the issues facing the AF contracting community by providing the following five core capabilities:

- Contract Requirements; Contract Generation; Contract Management; Performance Management; Contracting Domain Process Management

The United States Department of Agriculture's (USDA) Enterprise Application Services Division fulfills the Software Developer and Sustainer roles. USDA's Digital Infrastructure Services Center (DISC) is responsible for the management and operation of the Data Center Hosting Services (DCHS).

DCAPES is the Air Force (AF) tool to plan and execute major combat operations, disaster responses, or any mission necessitating the deployment of AF personnel or equipment.

ACAT Level: Software Acquisition Pathway (SWP) - ACAT IIIe

Resource Provider: ACC/A5/2C

Primary Customer: AF/A3O, AF/A1P, AF/A1M, AF/A4L, AFPC, AFRC, ANG, MAJCOMS, all Wings

Current Contractor/Contract Type: Concept Plus/FFP (Development and Sustainment), Obsidian Global/FFP (Infrastructure, Integration and Help Desk), 1 Sync Technologies, LLC/FFP (Subject Matter Expert Services)

System Type: Client-server, Web-based

Number of Users: 12,000

Subsystems: N/A

WARFIGHTER BENEFITS

- Allows AF participation in the Joint Operations Planning and Execution System (JOPES) process through integration of automated decision support applications and information exchange capabilities to provide the means to plan, present, source, mobilize, deploy, account for, sustain, redeploy and reconstitute forces
- Provides all AF echelons with real-time command, control, planning and execution information supporting the AF manpower, personnel, operations and logistics force presentation and execution processes
- Enables the AF to posture trained and equipped forces, organized in effects-based operational capability packages supporting the AF Force Generation (AFFORGEN) presentation policy
- Supports AF planning missions by providing users the capability to receive and analyze operational planning taskings; develop, compare and prioritize alternative courses of action and prepare documents which support the Joint Strategic Capabilities Plan (JSCP), Unified Command and AF requirements and taskings
- Used to deploy more than 23,000 Airmen annually, worldwide

EZ Source facilitates the creation, organization and communications of sensitive, unclassified, competitive source selection documentation used in the source selection evaluation process.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: SAF/AQCI

Primary Customer: SAF/AQC, MAJCOMs

Current Contractor/Contract Type: Dine Source, LLC/FFP

System Type: Web-based

Number of Users: ~500+ personnel on 50+ programs (fluctuates based on the number of active Source Selections)

Subsystems: N/A

WARFIGHTER BENEFITS

- Mandated by SECAF for acquisitions above \$100M as specified in the AFFARS (MP5315.3, Para 4.2)
- Ensures SS decisions are based upon a robust process, backed by data and analysis, and delivered in a standard format for acquisition efforts AF-wide
- Provides standardized SS process and associated reports/briefings as well as AF ACE oversight and support to ensure product quality, policy/regulation compliance, and to reduce the likelihood of successful contract protests
- Product Goals:
 - Success of AF mission goals: Ensure contractors selected for programs are qualified, affordable, and capable of accomplishing the tasks within AF specified cost, schedule, and performance boundaries
 - Stewardship of AF Resources: Ensure best value SS decisions, minimize SS teams' members' time away from station, and minimize program impacts due to extended SS processes (potentially a result of generalized RFP requirements, SS evaluation parameters which have logic disconnects/ill-defined criteria/do not evaluate lynchpin program requirements)
 - Quality Control and Workforce Growth: Ensure quality SS data is generated, lessons learned are gathered by AF ACE offices for process improvement and provide consistent SS training for the AF workforce to understand the value/risks associated with the SS process (particularly how those could help or hurt their programs, and how to build strong, defensible contract award decisions)

GFM-DI Department of the Air Force Organizational Server (DAFOS) serves as the authoritative data source for DAF force management across the DoW, delivering critical force-structure data to enable real-time strategic war planning by Combatant Commanders and Pentagon planners. DAFOS provides comprehensive hierarchical organizational visibility with granular detail extending to individual billets and assets, encompassing historical, current, and projected force structures across all Air and Space Force organizations. The system generates standardized force structure data aligned with Joint Staff J8 specifications, ensuring consistent, centrally-managed datasets that maintain full interoperability within net-centric environments. As the definitive source for DoW force management data, DAFOS enables seamless integration with external users, systems, and mission-critical functions, supporting enhanced decision-making capabilities across the joint force enterprise.

ACAT Level: ACAT III (NSS)

Resource Provider: ACC/A589

Primary Customer: AF/A3OD

Current Contractor/Contract Type: Appddiction Studios (Development/Sustainment, FFP) Optimized Technical Solutions (Program Office Support, FFP)

System Type: Machine-to-Machine

Number of Users: There are numerous DoW users accessing the data through various systems and 19 users using our CAP.

Subsystems: N/A

WARFIGHTER BENEFITS

- A Joint Staff and OSD initiative to standardize force structure information for COCOMs and Administrative Commanders (ADCONs)
- Provides visibility of the entire force structure as a function of time: past, present and future
- Supports transformation of the DoW force management process
- Links force structure, resources and capabilities to the decision process throughout assignment, allocation and apportionment

Capability Delivery Manager:

Mr. Daniel Golem
937-241-4310

LOGFAC provides the warfighter with an accurate assessment of the AF WRM stockpile, aircraft consumable/non-consumable requirements based on Wartime Aircraft Activity, the AF Wartime Consumable Distribution Objective, and shortfalls/overages. It is a mathematically intense application enriched with complex algorithms that produce feasibility assessments for executing plans. Produces associated cost estimates for wartime requirements. Accessible via SIPRNET. Web-enabled automated information system used to determine sortie feasibility assessments of an OPLAN by comparing munitions, fuels and supply requirements with worldwide on-hand pre-positioned assets.

- Distributes theater munitions requirements received from the Non-Nuclear Consumables Annual Analysis (NCAA) system which includes War Reserve Material (WRM), Tanks, Racks, Adapters and Pylons (TRAP) requirements
- Produces the War Consumables Distribution Objective (WCDO) that authorizes consumable items stock levels at worldwide Air Force installations in support of wartime aircraft activity

BCAT Level: N/A (NSS)

Resource Provider: ACC/A5C

Primary Customer: SAF/AF and A5, MAJCOM, COCOM Operations and Logistics Planner

Current Contractor/Contract Type: Concept Plus/FFP

System Type: Web-based

Number of Users: 75

Subsystems: N/A

WARFIGHTER BENEFITS

- Produces the AF Wartime Aircraft Activity (WAA) report
- Projects munitions end items based on component availability by base of theater of operation
- Produces the munitions and non-munitions War Consumable Distribution Objectives (WCDO) for theater pre-positioning
- Supports capability assessments for real world taskings, as well as ad hoc scenarios based on available/projected sustainment assets
- Projects sustainment requirements; “what-if” functions to determine shortfalls and associated costs

The Logistics Module application provides the Air Force community a web-based tool to assist in the Forecasting, Planning, Scheduling and Execution of real-world and exercise related to cargo movement activities. The application provides crucial functionality for logisticians and unit deployment managers from Head Quarters Air Force and Major Commands down to individual units. It provides the ability to create, maintain and delete standard and tailored Unit Type Code capabilities packages.

The following capabilities provided to the logistics community:

- Retain and reuse planning and scheduling data
- Consumption and Exportation of data from partner systems
- Create material lists, load lists, packing lists
- Create transportation management documents
- Create execution and status reports

LOGMOD helps maintain combat units, the required support materiel and the required personnel in constant deployment readiness.

BCAT Level: N/A (NSS)

Resource Provider: HQ AF/A4IS

Primary Customer: HQ AF/A4LR

Current Contractor/Contract Type: 1Sync Technologies/FFP, HTGS-Culmen JV/Labor hour

System Type: Web-based

Number of Users: 6,919

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides logistics planners at AF, AF Reserve and Air National Guard levels a web-based application for deployment deliberate planning and crisis action execution
- Manages standard Unit Type Code (UTC) logistics details and assembles contingency plan equipment requirements, provides personnel readiness tracking capability, scheduling and monitoring capabilities
- Primary system for more than 6,919 base-level users to perform planning, development, sustainment and execution of UTCs for exercises, AEFs and contingencies

MICT is a cradle-to-grave tool for managing Inspector General (IG) self-inspections conducted throughout the AF. MICT is a single-source used for the collecting and reporting of IG findings worldwide, real-time access inspection data. MICT supports the processes for standardizing checklists to facilitate a reliable and replicable self-inspection process across the AF enterprise.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: SAF/IG and AFIA/IG

Primary Customer: SAF/IG, AFIA/IG, MAJCOM/IGs, Wing/IGs **Current**

Contractor/Contract Type: Alaska Northstar Resources/FFP **System Type:** Web-based

Number of Users: 400,000 registered users (105,000 – 250,00 active users)

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides an essential IT tool supporting mandated and critical service to the USAF and DoW
- Facilitates analysis and decision support for SAF/IG and MAJCOM IG operations
- Provides senior leadership a better understanding of the status of the IG inspections

CONTACT

Capability Delivery Manager:

Capt Elijah Stewart

937-257-8927

MRDSS provides decision support to MAJCOM and USAF planners for the management and deployment of medical personnel and equipment. Provides total visibility of equipment and supplies, deployment training requirements, and readiness skills verification to ensure fully capable medical support for the warfighter.

BCAT Level: BCAT III (NSS)

BCAC Phase: Capability Support

Resource Provider: AFMC

Primary Customer: AFMEDCOM/A3T

Current Contractor/Contract Type: JYG Solutions Group, LLC/FFP

System Type: Web-based

Number of Users: 37,357

Subsystems: N/A

WARFIGHTER BENEFITS

- Enables the MAJCOMs to levy deployment and employment requirements and determine the readiness for each assigned or gained unit by Unit Type Code (UTC)
- Enables the AF Medical Service (AFMS) community to effectively monitor and manage a unit's personnel, training and equipment readiness status UTC
- Projects manpower resources and materiel costs for current and fiscal out-years
- Enables users to immediately assess materiel shortfalls (both War Reserve Stocks and Homeland Defense) down to the line-item detail and determine costs associated with improving readiness
- Tracks availability of Low Density-High Demand medical specialists to fill critical deployment positions

ORION is AFOSI's central mission application used to support the Department of the Air Force and Department of War by ensuring criminal violations of the Uniform Code of Military Justice and the United States Code are fully and properly investigated, documented, and managed. Operationally, ORION reduces redundancy, streamlines investigative workflows, promotes standardization across the Command, and decreases the administrative burden on agents and support staff.

Technologically, ORION leverages the affordability, scalability, and inherent security of modern cloud computing, while utilizing low-code/no-code development to rapidly adapt to evolving mission needs, integrate with partner systems, and deliver new capabilities without long development cycles.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: SAF/IGX

Primary Customer: AFLOSA, DAF Commanders, Federal Bureau of Investigations

Current Contractor/Contract Type: HumanIT Solutions, LLC/SBIR Phase III (FFP-Labor & Materials-ODC)

System Type: Cloud-based web application

Number of Users: ~2,500

Subsystems: N/A

WARFIGHTER BENEFITS

- Directly supports 2,500 Special Agents, Intelligence Analysts and other professional staff across 300 global locations conducting criminal investigations and law enforcement operations.
- Performs full investigative life-cycle management functions for all unclassified criminal investigations and related activities to include undercover operations, forensic analyses, and investigative specialty activities
- Facilitates the reporting of criminal data to the National Incident Based Reporting System (NIBRS), the Defense Central Index of Investigations (DCII) and the Defense Sexual Assault Incident Database (DSAID).
- Used to conduct criminal indexing to prevent the unauthorized purchase of firearms by prohibited persons.
- Ensures readiness, good order, and discipline by managing all felony-level criminal investigations and data related to DAF military members and civil service employees.
- Accelerates investigative workflows, enabling faster case initiation, evidence entry, and closure.

FINANCIAL SYSTEMS

MISSION

Provide the best financial tools to run the Department of the Air Force Worldwide

CAPABILITIES

Integrated, reliable and auditable financial systems for the Department of the Air Force

The Automated Project Order (APO), also referred to as J025A, system is responsible for electronically processing AF Materiel Command (AFMC) Project Order Form 181 for the Air Force Sustainment Centers.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AFMC/FMF

Primary Customer: AFMC/FMF

Current Contractor/Contract Type: R Dorsey + Company/FFP

System Type: DISA Mainframe

Number of Users: 425

Subsystems: N/A

WARFIGHTER BENEFITS

- Maintains situational awareness of Depot Purchased Equipment Maintenance (DPEM) funds
- Notifies users when they need to enter financial system (GAFS/BQ) to commit or obligate funds
- Provides status of all end items repaired organically in the Air Force Sustainment Centers, and identifies the need for adjustment of funds
- Provides access to historical data and reports
- Major Interfaces: FIT/DIFMS, G004L, EXPRESS

The Command Management System (CMS) is AF Materiel Command's (AFMC) Authoritative Data Source in support of AFMC's Planning, Programming, Budgeting, and Execution (PPBE) Process. CMS is web-based and is used by both AFMC to build and refine the Program Objective Memorandum (POM) submission (approximately \$13B) and PEMs at HAF to review AFMC's POM.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: HQ AFMC/A5/8P

Primary Customer: HQ AFMC/A5/8P

Current Contractor/Contract Type: Concept Plus LLC/FFP

System Type: Web-based

Number of Users: 230

Subsystems: N/A

WARFIGHTER BENEFITS

- The requirements and funding contained within CMS reflects AFMC's total commitment towards the development, acquisition, and sustainment of air platforms required to defend the United States and its interests
- A fully functional CMS is essential to our ability to develop a balanced plan and identify the additional funding required to ensure our continued support to the warfighter
- Provides capability to review and collaborate with HAF functionals as the Air Staff Panels build POM documentation (RAPIDS)
- Provides capability to input, consolidate, and deliver AFMC's POM

The Commanders' Resource Integration System (CRIS) stands as a pillar of support for the United States Air Force, offering a comprehensive and efficient solution for financial management decision support. CRIS is a multi-tiered, relational data warehouse that provides invaluable visibility into financial transactions across all echelons of the Air Force, ingesting and integrating data from a multitude of system interface partners. With its user-friendly interface and ad hoc query capabilities, CRIS streamlines data collection efforts, allowing more time to be devoted to essential decision support activities. Serving a substantial userbase of 6,700 individuals, CRIS facilitates access to vital data through its business intelligence tool or web application. CRIS handles over 3.3 million queries annually, maintaining an impressive average overall query response time of just under 20 seconds. With CRIS exceeding a quarter century of service, its mission remains clear: to empower the warfighter through the delivery of reliable, accurate, and timely data that supports decision-making processes across all levels of the Air Force.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: SAF/FMIN (AFFSO)

Primary Customer: SAF/FMIN (AFFSO)

Current Contractor/Contract Type: Absolute Strategic Technologies, LLC (AST) Joint Venture Team/FFP

System Type: Cloud, Web-based

Number of Users: 6,700

Subsystems: N/A

WARFIGHTER BENEFITS

- Empowers operational commanders and the financial community with robust reporting and analysis tools, providing clear visibility into resource utilization through near real-time insights into financial transactions across all echelons of the Air Force
- Enables strategic planning and resource forecasting by providing customizable reporting tools and dashboards allowing users to visualize and analyze financial data in meaningful ways
- Supports agile decision-making by providing ad hoc query capabilities, enabling users to extract actionable insights from vast amounts of financial data on demand
- Strengthens financial management capabilities by adhering to Financial Improvement and Audit Readiness (FIAR) standards, ensuring data integrity and reliability for decision-making purposes
- An Open Database Connectivity (ODBC) tool that allows CRIS to operate with commercial business analytics tools like Power BI, Tableau, Qlik, and Microsoft Excel, enabling users to create automated direct-to-briefing visualizations

The Air Force Integrated Personnel and Pay System (AFIPPS) is a web-enabled, Enterprise Resource Planning (ERP) solution that integrates existing personnel and pay processes into one self-service system. AFIPPS supports how the Department of the Air Force (DAF) owns and operates payroll. AFIPPS continues the transformation by providing the accurate and timely delivery of pay, entitlements, allowances, and benefits to all Active-Duty Air Force (RegAF) and Space Force (USSF), Air National Guard (ANG), and Reserve (USAFR) components. AFIPPS represents the DAF's commitment to modernize payroll business practices and provide enhanced support to service members and their families by further integrating pay with personnel. AFIPPS will eliminate DAF reliance on the unsustainable Defense Finance and Accounting System (DFAS) and the Defense Joint Military Pay System (DJMS) for payroll processing and ensure improved auditability of service member pay.

BCAT Level: BCAT I

BCAC Phase: Acquisition, Testing & Deployment

Resource Provider: SAF/FM

Primary Customer: SAF/FMF

Current Contractor/Contract Type: Accenture Federal Services, LLC/CPIF

System Type: Enterprise Resource Planning (ERP) – Pers/Pay

Number of Users: 550,000+

Subsystems: N/A

WARFIGHTER BENEFITS

AFIPPS will improve functionality for:

Service Members

- One record of service that stays with a member throughout his/her career
- Integrated payroll with the core personnel records
- Improved identification security utilizing Common Access Card (CAC) sign-on
- Self-Service capabilities allowing service members to review their record for accuracy
- Self-initiation of select actions for members across all DAF Components

FM (6F0X1) and Personnel (3S0X1) Technicians

- One-time data entry which helps streamline work processes and reduce work duplication
- One system for military personnel and pay transactions which reduces the likelihood of data errors that arise as a result of separate transaction environments (MilPDS and DJMS-AC/RC)
- Workflow for automated routing of pay and leave processes
- Comprehensive report and query capability for enhanced system performance

Commanders

- Integrated, timely, and accurate personnel information to provide better decision making
- Confidence in FM and personnel policies/procedures and appropriate audit compliance controls

Capt Matthew Moore
210-565-3535

The Automated Record Management System (ARMS-LC) is the Department of the Air Force repository and documents management system for all Official Military Personnel File (OMPF). The system facilitates automated storage, retrieval, and life-cycle management of the Master Personnel Record Group (MPRG) for the Total Air and Space Force and the Military Human Resource Record (MHRR) for retired and separated persons, containing the records of over three million current and former U.S. Air and Space Force members with well over 80 million documents in total.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AF/A1

Primary Customer: AF/A1

Current Contractor/Contract Type: Absolute Strategic Technologies/CPFF

System Type: Cloud-based (A1VDC) Custom Web Services and Oracle Database System

Number of Users: 3M+ (Active Duty, Guard, Reserve, AF Retirees, and other Veterans)

Subsystems: N/A

WARFIGHTER BENEFITS

- Provides repository for AF digital personnel record files in lieu of paper personnel file located in a local Manpower Personnel Flights (MPF)
- Directly feeds the Electronic Board Operations Support System (eBOSS) and the Personnel Records Display Application (PRDA) of the Virtual Personnel Services Center (vPSC)
- Indirectly and directly supports demographic studies commissioned by HQ AF/A1 affecting manpower decisions worldwide

CONTACT

Capability Delivery Manager:

Capt Matthew Jensen

210-565-2811

The electronic Board Operations Support System enables viewing, scoring, vectoring and feedback for approximately 1300 Total DAF (military and civilian) enlisted boards and development team events per year. eBOSS supports Force Management, Special Selection Boards and Special Boards, Senior Non-Commissioned Officer Evaluation Boards, Senior Non-Commissioned Officer Supplemental Boards, Air National Guard Federal Recognition Colonel Board, General Selection Boards, Reserve General Officer Qualification Board, Reserve General Officer Vacancy Board, Command Screening Board, Promotion Enhancement Program, and Management Level Reviews. eBOSS supports up to 150 simultaneous boards with up to 85,000 candidates spread across multiple boards.

BCAT Level: BCAT III

BCAC Phase: Capability Support

Resource Provider: AF/A1

Primary Customer: AFPC/PB

Current Contractor/Contract Type: Absolute Strategic Technologies/CPFF

System Type: Web-based

Number of Users: 1,300 boards per year; each board has between 12-45 members (number of board members vary according to the number of candidates)

Subsystems: N/A

WARFIGHTER BENEFITS

- Enables Promotion Board Secretariats, Development Teams (DTs) and others performing in an official capacity to access, review, score and/or make recommendations on an Airmen/Guardian's (military and civilian) promotion recommendation, promotion selection or placement and timing for entry into education, training and/or assignment opportunities
- Facilitates force management and force development, enabling boards for Force Shaping, Reduction In Force and Selective Early Retirement
- Eliminates need to copy, store and retrieve paper records used by the Promotion Boards, Force Shaping Boards and development Boards to manage all active-duty personnel
- Reduces the time required for senior leaders to participate in boards

GRB is a commercial off the shelf (COTS) product tailored for government use and managed by the DAF on behalf of the DoW. It is used by all DoW components and provides 800K+ DoW civilians with access to information and transactional capability to health insurance, life insurance, Thrift Savings Plan (401-K type investment), retirement applications, eSeminars (information on benefits), and retirement or separation calculators. DoW civilian employees access these benefit applications and information through a web application from their initial hire until they decide to separate or retire. These transactional tools have automated the process of electing benefits.

The overall purpose of Human Capital Management Software-as-a-Service (HCM SaaS) is to support the management, development, and sustainment of Total Department of the Air Force in the core mission of air, space and cyberspace operations from recruiting to separation or retirement. To support this transformation, the Department of the Air Force is engaged to deliver a modern, comprehensive, globally accessible, agile, and fully automated Human Resource (HR) capability enabling the member's self-service environment and the development and enhancement of a more diverse Department. HCM is a complete cloud solution that connects every human resource process—and every person—across the enterprise. With a single user experience and data model, seamless processes, and AI-embedded infrastructure, HCM helps redefine the 'next generation' personnel system for the Department of the Air Force.

Digital University (DU) is a comprehensive learning platform strategically designed to cultivate digital fluency and organic technical expertise within the USAF, USSF, and DoW. By aggregating cutting-edge resources from industry, academia, and government entities, DU provides a centralized hub for personnel to upskill and reskill in critical digital domains. Specifically, but not limited to, DU provides upskilling and certification training for Artificial Intelligence/Machine Learning (AI/ML), Cybersecurity, Data Analytics, Data Engineering, Software Engineering, and several other career training compliances to meet warfighter and mission requirements. Its integrated training pathways offer structured guidance, enabling users to achieve specific learning objectives and contribute effectively within a rapidly evolving digital landscape. DU represents a forward-thinking approach to workforce development, poised to become a cornerstone learning capability across the entire Department of Defense.

MISSION

Provide premier IT operational capabilities that enable IT acquisition and sustainment by delivering AFLCMC-Gunter core network services and scalable enterprise

CAPABILITIES

IT support such as infrastructure, network storage, application and server management, IT asset management, records management and quality assurance

BUSINESS AND ENTERPRISE SYSTEMS PRODUCT INNOVATION (BESPIN) GBO

BESPIN (Business and Enterprise Systems Product Innovation) is the Air Force's leading mobile and web software factory, operating under PEO BES. With a DevSecOps culture, accredited CI/CD pipeline, and agile delivery framework, BESPIN specializes in delivering scalable, secure, and user-centered digital capabilities across the Department of the Air Force and DoW enterprise.

Through its Mobile Application Development Center of Excellence, BESPIN has delivered over 30 applications into production, supporting Mission Support, Logistics, Maintenance, Personnel Systems, and Special Operations.

BCAT Level: N/A

Resource Provider: AFLCMC/GB Core, SBIR Phases II & III, STRATFI, APFIT, SAF/CN, UFRs

Primary Customer: AFSOC, ACC, AMC, PACAF, ANG, MAJCOM mission support units, USSF, DoW-wide

Current Contractor/Contract Type: Includes SBIR Phase III IDIQs (Clarity, Trek10, Skylight, Omni Federal), STRATFI/TACFI investments in Ditto, Cape, Blue Cedar, Fearless, and Rebellion

System Type: Tactical Communications + Software Platform

Number of Users: 275,000+

SUBSYSTEMS: N/A

WARFIGHTER BENEFITS

- Accredited CI/CD pipeline (MDaaS) with continuous Authorization to Operate (cATO), delivering applications to Android & iOS app stores, plus MAJCOM Mobile Device Managers (MDMs) Specializing in deployment to CloudOne. Saves average of 13 months schedule per app
- Airmen enablement culture, via Paired-Programming with industry SMEs, and Digital University
- RAWHIDE – A cross-platform cargo deployment application modernizing the Cargo Deployment Function (CDF)
- Digital University - online learning platform for military members and DoW organizations to upskill their cyber proficiencies. The platform offers 37,000 courses, from 16 industry leading technology giants, to over 100,000 users to become digital experts and master multiple digital domains
- BIZINT - Provides mobile application for remote and low-bandwidth environments to deliver logistics support directly to the warfighter

G

The Mobile Operations Support Suite (MOSS) is a natural extension of BESPIN's mobile-first software mission - delivering tactical communications, edge computing, and mission-ready networking capabilities in support of Joint and Coalition forces. Developed through STRATFI, APFIT, and direct mission engagements with AFSOC and other operational commands, MOSS integrates BESPIN's DevSecOps pipelines, secure application delivery via CloudOne and mobile app stores, and field-deployable hardware/software configurations tailored for use in contested, degraded, denied, and disconnected (C-D-D) environments.

BESPIN underpins MOSS by providing accredited DevSecOps pipelines (MDaaS) to deliver tactical applications via mobile device managers (MDMs), the Apple/Google App Stores, and CloudOne, along with supporting application sustainment, security patching, and CI/CD operations for in-field apps and core services.

BCAT Level: N/A

Resource Provider: AFLCMC/GB Core, SBIR Phases II & III, STRATFI, APFIT, SAF/CN, UFRs

Primary Customer: AFSOC, ACC, AMC, PACAF, ANG, MAJCOM mission support units, USSF, DoW-wide

Current Contractor/Contract Type: Includes SBIR Phase III IDIQs (Clarity, Trek10, Skylight, Omni Federal), STRATFI/TACFI investments in Ditto, Cape, Blue Cedar, Fearless, and Rebellion

System Type: Tactical Communications + Software Platform

Number of Users: 275,000+

SUBSYSTEMS: N/A

WARFIGHTER BENEFITS

- Ruggedized, portable kits that deliver secure private 5G/LTE, mesh networking, and multiple backhaul options (SATCOM, HF, LoS). Enables "Day 0" mission comms without host-nation dependence.
- Field-grade compute platforms that run BESPIN-built apps (e.g., BIZINT, RAWHIDE) at the edge, support offline data sync, tactical AI/ML, and operate without continuous cloud access.
- Seamless routing over MILSAT, commercial SATCOM, HF, LoS radio, LTE/5G, mesh—based on mission need and availability.
- Built-in identity enforcement, encryption at rest/in transit, and endpoint trust modeling; aligned with DoW cyber and zero-trust frameworks.
- Built to integrate into the broader DoW ecosystem including AFNET, CloudOne, and JADC2; uses standards such as WinTAK, TRAX, and Cursor on Target for joint/coalition ops.
- Includes portable power, solar/hybrid options, and minimal RF signatures to support extended mission duration in denied areas.
- Open, standards-based stack that supports integration of partner or third-party components (e.g., tactical radios, CAKE/WISP sensors, third-party AI models).
- AFSOC Distributed Command and Control (DC2) – Serving as forward C2 nodes in contested environments.
- Humanitarian Assistance / Disaster Response (HADR) – Deployable kits support Day 0 network activation post-natural disaster.
- Expeditionary ACE Operations – Delivers resilient mobile C2 in support of Agile Combat Employment posture and logistics nodes.
- Partner Nation / Coalition Interoperability – Supports secure, controlled communications and app access in multilateral operations.

The FAS is a frontline 24/7/365 Tier-1 enterprise-wide consolidated helpdesk supporting DoW users worldwide. Established in 1964 and consolidated in 1983 as a cost saving efficiency to provide continuous support to warfighter, the FAS is committed to increasing their customers' productivity by solving their problems in the shortest time possible. The FAS supports over 70 systems and troubleshoots ~300,000 calls per year. Our customer-centric approach provides cradle-to-grave support. If a problem cannot be solved at Tier-1, it is escalated to the next level for resolution and tracked to completion. If it is determined that the problem is the result of a software deficiency, a Deficiency Report will be opened and tracked through to the release of the corrected software. The FAS provides enterprise-wide metrics. We leverage our position as the customer's first and last contact to provide critical data for root-cause analysis and process improvement.

Major Incident Management (MIM) serves as an operational focal point for BES leadership and outside organizations. MIM communicates with BES application teams and reports current operational status, future network maintenance, and high priority network change requests. In addition, they act on behalf of BES PEO to prioritize, troubleshoot, and link DoW organizations to resolve high priority incidents impacting AF missions. Finally, MIM provides a Problem Management service that records and executes root cause analysis on reoccurring incidents in efforts to improve the user experience utilizing BES applications.

SERVICE MANAGEMENT

Agile Services Office

Consolidated Business Office (CBO)

Digital Enterprise Solutions

IT Software and Services (ITSS)

MISSION

Deliver enterprise-wide Agile Software Development, Service Management, and innovation services that enable capability delivery

The Agile Support Office is responsible for equipping BES Capability Delivery Teams (CDTs) to implement and continuously improve agile methodologies enabling rapid capability delivery.

BES Atlassian Toolset (BAT) – The BAT is a suite of tools designed to aid in Agile Software Development by providing tools to establish a software repository, knowledge bases, ticketing systems, documentation repositories, Kanban boards, sprint planning and execution, and testing. The Agile Services Office establishes/maintains licensing, guidance and management of the BAT for use by the BES Directorate and external partners.

Agile Framework Guidance & Policy – Develop deliver Agile Software Development guidance and best practices for BES CDTs using or adopting Agile strategies and Agile frameworks. Provide templates and guidance to acquire and implement contracted support for Agile Software Development.

Agile Coaching – Provide coaching and consultation services to BES CDTs engaged in or transitioning to Agile Software Development. Consultation services include: Agile team start-up and implementation guidance; best practice tool usage to enable agility and metrics; facilitate the migration from a Waterfall Software Development Lifecycle to Agile Software Development; and team adoption of best practices and process improvements (Self-Assessments and Metrics).

Agile Workforce Development – Provide workshops to BES members engaged in or migrating to an Agile approach. Deliver in-house Agile Fundamentals and BAT training. Establish requirements and advocate for role-specific Agile training events, CBTs or virtual training opportunities as required by BES CDTs.

BCAT Level: N/A (Support Office)

Resource Provider: N/A

Primary Customer: BES Directorate

Current Contractor/Contract Type: Alaska Northstar and EPASS

System Type: N/A

Number of BAT Users: 5,500+

Subsystems: N/A

WARFIGHTER BENEFITS

- Facilitates, via training, coaching, and mentoring, the adoption of an Agile mindset across the Service Delivery and Capability Delivery Teams
- Advocates for adaptive approaches matching the appropriate software engineering and development processes to customer and warfighter requirements
- Empowers BES Capability Delivery Teams and Products Line Managers to accelerate the delivery of capabilities to warfighters
- Facilitates implementation and adoption of enterprise-wide tools and associated processes that enable Service Delivery and Capability Delivery Teams to complete their missions

Digital Enterprise Solutions provides business system functional sponsors with two repeatable services that launch high confidence programs targeted at optimizing current and future DoW IT system investments. These services are:

Early Acquisition Services – Provides Functional Sponsors assistance in completing the activities, deliverables, and governance for the pre-acquisition phases of the Business Capability Acquisition Cycle (BCAC). Support and assistance to Functional Sponsors includes early acquisition planning, early systems engineering, alternatives analysis, market research, cost estimation/analysis, scheduling, and transition planning.

MACH5 – Provides customers with a centralized enterprise platform for case management and workflow applications. Enabling capabilities to be provided to Warfighter in weeks and months vs. years.

Concept Exploration Services – Provides customers a means to explore innovative and feasible alternatives to meet new defense business capability needs or alternatives for existing capabilities based on disciplined cost/benefit analysis. We offer streamlined, rapid, and iterative approaches from requirements analysis and design to development and fielding.

BCAT Level: N/A (Support Office)

Resource Provider: Multiple; Sponsoring Offices of New Capability Initiatives

Primary Customer: SAF 2-Ltr Functional Sponsors

Current Contractor/Contract Type: Alaska Northstar, Direct Mission Support (DMS) SME III, and EPASS

System Type: N/A

Number of Users: N/A

Subsystems: N/A

WARFIGHTER BENEFITS

- Defense Business Systems (DBS)-focused early acquisition planning
- Rapid transition of high-confidence acquisition programs
- Increased effectiveness and efficiency of lifecycle capability deliveries
- Optimizes BES utilization of technical environments and supporting infrastructures
- Availability of Mach5 Low Code factory for application development/ hosting, reducing the time from mission need to mission capability and providing capabilities to the warfighter at the speed of relevance

ITSS provides worldwide IT acquisition strategies to leverage shrinking AF buying power. ITSS is responsible for offering secure, integrative, and cost-effective IT software and services through enterprise contracts and agreements via DoW Network Centric Solutions (NETCENTS-2), Small Business Enterprise Application Services (SBEAS) and Enterprise Software Initiative (ESI), Oracle ELSA, Gartner Research and Advisory IT Licenses, Adobe, and Cisco solutions. Strategic sourcing vehicles deliver manpower and contract savings by procuring standardized, high quality, and compatible IT software and services across the AF at greatly reduced prices. Software and Services includes:

Enterprise Software provides acquisition and license management of the Dept of Air Force Oracle Enterprise License Agreements (ELAs); Adobe Joint Enterprise Level Agreements; Cisco Unified Communication and Cisco GEMSS Enterprise Agreements, and BES Gartner Research and Analysis (RAS) contract.

NETCENTS-2 family of ID/IQ contracts provides highly flexible contract vehicles delivering capabilities across the entire range of IT product and service domains. Note NETCENTS-2 ordering periods have ended with last performance period ending March 2027.

SBEAS is the mandated contract vehicle for BES requirements that fit within its scope and may be used by all other MAJCOMs and Agencies that support an Air Force requirement. Additional IT services include, but are not limited to documentation, operations, deployment, cybersecurity, configuration management, training, commercial off-the-shelf (COTS) product management and utilization, technology refresh, data and information services, information display services and business analysis for IT programs.
