The SMART GUIDE for Upcoming Acquisitions

An outline of acquisition information for upcoming business opportunities in BES for the next 18 months
Business and Enterprise Systems

We run the SYSTEMS that run the AF!
An outline of acquisition information for upcoming business opportunities in BES for the next 18 months

OBJECTIVE
Enhance communications between members of Industry and the Business and Enterprise Systems (BES) Directorate

DISCLAIMER
The following opportunities listed in the Smart Guide are speculative and the appearance of the information in this document or website in no way guarantees a contract action will be awarded. There is no guarantee as to the requirements described in this document and as to the form or type of acquisition for each of these projected requirements. The Air Force will not guarantee form and/or timing of later notifications (e.g. RFQ, RFP, BPA, Task Order, etc). It is the responsibility of interested parties to follow-up diligently in order to determine if and when a solicitation is advertised.

For an electronic version, please visit www.airforcebes.af.mil
THINGS TO KNOW

For questions about BES communications and events, please contact the BES Strategic Communications Team at besstratcomm@us.af.mil

To schedule a meeting or company capability presentation, complete the BES Meeting Request Form located on our website at www.airforcebes.af.mil/besvendorcomm

BES LOCATIONS:

WP Wright-Patterson AFB
OHIO

G Maxwell-Gunter Annex AFB
ALABAMA

R Randolph AFB
TEXAS
Program Description: RMS encompasses the automated and manual functions of AFMC’s material requirements process which forecasts and controls procurement and repair requirements of materiel needed for logistics support of AF weapons systems.

Objective: This requirement provides technical maintenance, sustainment, system modification, and developmental test and evaluation for the RMS suite of cloud and mainframe hosted systems.

Scope: The contractor shall perform all program management, planning and analysis, maintenance and sustainment, system modification, developmental test and evaluation (in an agile software development environment), system surveillance, and associated system life cycle documentation to support authority to operate approvals (i.e. architectural documentation development, interface control device auditing and documents) during a period of system subsumption and decommissioning. Therefore, each subsystem will be identified as an individual CLIN.

Acquisition Approach:
8(a) Competition

Period of Performance:
Jun 2022 – Jun 2027 (One year base period plus four 1-year option periods)

Anticipated FOPR Release Date:
4QFY21

Estimated Dollar Value:
$8M - $9M

NAICS Code:
541511 – Custom Computer Programming Services

Small Business Set Aside:
Yes

Incumbent:
Ventech Solutions Inc., 8(a), FA8770-17-C-0009
### Program Description:
LMDB supports over 450 end-users at three ALCs, HQ AFMC, and HQ USAF. LMDB computes the buy, repair budget data, and provides reason code information for termination actions. Logistics Reassignment (LR) is another application system LMDB performs to transfer selected items to the Defense Logistics Agency or other services. LMDB is comprised of two sub-systems: Automated Budget Compilation System (ABCS) and Logistics Reassignment (LR). ABCS collects, organizes, and integrates data from Air Force legacy systems to provide Financial Management reports for the Secretary of the Air Force (SAF).

### Objective:
This requirement provides maintenance, sustainment, system modification, and developmental test and evaluation support.

### Scope:
This effort is for technical maintenance, sustainment, and development services for the Logistics Management Data Bank (LMDB) (D075) program.

### Acquisition Approach:
8(a) Sole Source Direct Award

### Period of Performance:
Jun 2022 – Jun 2027 (One year base period plus four 1-year option periods)

### Anticipated FOPR Release Date:
4QFY21

### Estimated Dollar Value:
$3.7M - $3.9M

### NAICS Code:
541511 – Custom Computer Programming Services

### Small Business Set Aside:
Yes

### Incumbent:
Ventech Solutions Inc., 8(a), FA8770-17-C-0009
Program Description: Provides a full range of subject matter services for information technology (IT) sustainment support for the Base Maintenance (Mx) Family of Systems (FoS). Base Mx is a collection of maintenance capabilities working together to provide enterprise-level automated maintenance management. The portfolio of systems provides peacetime and wartime readiness and operations support of aircraft status/availability for parts, simulators, communications-electronic, calibration of precision measurement equipment, mobile maintenance documentation, maintenance scheduling, maintenance web-enabled services, and support equipment maintenance activities at worldwide operating bases, Active duty Air Force, Air National Guard/AF Reserves sites. Base Mx currently consists of the following systems: IMDS Central Database (IMDS CDB), Maintenance Scheduling Module (MSM), Enhanced Maintenance Operations Center (EMOC), Training Business Area (TBA), Computer Software Configuration System (CSCS), Remote Access (RA), IMDS CDB Web Services, and Precision Measurement Equipment Lab (PMEL)/Automated Management System (PAMS), and Facility and Equipment Maintenance (FEM).

Objective: Compete to replace current AMS SME support contract (18-mo effort)

Scope: Provide support to include, but not limited to maintaining databases, applications, instructions and manuals, training and problem identification, testing systems and subsystems, evaluating and documenting software changes, problems and deficiencies, including supporting agile cloud and mobile applications based efforts; and customer driven technologies advancement for logistics, etc.
**Program Description:** Provides a full range of Information Technology sustainment support for the Base Maintenance (Mx) Family of Systems (FoS). Base Mx is a collection of maintenance capabilities working together to provide enterprise-level automated maintenance management. The portfolio of systems provides peacetime and wartime readiness and operations support of aircraft status/availability for parts, simulators, communications-electronic, calibration of precision measurement equipment, mobile maintenance documentation, maintenance scheduling, maintenance web-enabled services, and support equipment maintenance activities at worldwide operating bases, Active duty Air Force, Air National Guard/AF Reserves sites. Base Mx currently consists of but not limited to the following systems: IMDS Central Database (IMDS CDB), Maintenance Scheduling Module (MSM), Enhanced Maintenance Operations Center (EMOC), Training Business Area (TBA), Computer Software Configuration System (CSCS), Remote Access (RA), IMDS CDB Web Services and Precision Measurement Equipment Laboratories (PMEL) Automated Management System (PAMS) and Facility and Maintenance (FEM).

**Objective:** Compete the replacement for the current Maintenance Operational System Support (MOSS) Technical services contract.

**Scope:** Performing Level III technical services which include corrective, perfective, adaptive and preventive maintenance.

**Acquisition Approach:**
NC-2 Applications Services Full & Open – Fair Opportunity Exception (FOE)

**Period of Performance:**
Mar 2021 – Mar 2022

**Anticipated FOPR Release Date:**
2QFY21

**Estimated Dollar Value:**
$3M

**NAICS Code:**
541511 – Custom Computer Programming Services

**Small Business Set Aside:**
No

**Incumbent:**
ARRAY Information Technology, Inc., FA8771-12-D-1011 0007

Program Description: FEM System delivers an automated tracking and control system for managing facilities and equipment including: emergency, corrective, preventative maintenance, project planning, equipment calibration, equipment maintenance contracts, inventory control, bar-coding capabilities, purchasing, costing for equipment, material and labor and equipment dispatches/moves.

Objective: Put into place FEM support as directed by AFMC/A4 Strike Team to HI4 to subsume 9th AF capabilities.

Scope: Provide technical support which includes software development, classroom and over the shoulder user training, implementation, support of the production application, data migration support, interface development, configuration management and help desk support and other activities such as facilitation of requirements meetings, user conferences, and other program management related meetings that support the development, implementation and maintenance of the FEM application.
Program Description: Management decision support tool used to posture depot level workloads and automated workflow management of Air Force DSOR processes.

Objective: Provide system sustainment/baseline modification changes to DSOR AMS applications utilizing SharePoint “no code” configuration and customization changes.

Scope: Provide operational, software, and workflow management support of the DSOR AMS applications. Support includes software engineering activities, site collection administration, SharePoint design and training documentation for all applications, complex SharePoint design configuration and customization to include complex calculations and formulas, complex and calculated metrics for reporting, maintaining architecture drawings for all applications, and providing support for data conversion and data migration in support of process improvements, technical upgrades, and technical and function re-designs to all applications.

Acquisition Approach: 8(a) Competitive

Incumbent: Stellar Innovations & Solutions, Inc., FA8770-20-C-0010, Directed 8(a)
Program Description: Centralized AF official system of record and DoD critical financial feeder system (G100A) for all USAF pods. The financial module maintains data on over 5,000 pods w/an acquisition cost of over $7.2 billion.

Objective: Provide system sustainment/integration support to ensure continuity of RAMPOD applications within a secure AF

Scope: Provide services to include analytical operations support, software sustainment support and system engineering for RAMPOD applications, servers and users. Support includes software maintenance, systems engineering analysis and reporting, database operational support, integration support and processing and validation of incoming data. Services required also include the maintenance of the Chief Financial Officer (CFO) compliant Oracle database that interfaces with the Defense Financial Accounting System (DFAS) and the update of financial records concerning ownership burden in real time.

**Program Description:** ILS-S is a collection of retail supply capabilities working together to provide an enterprise-level view to Air Force retail supply customers, to manage materiel and supplies located in warehouses, in-transit, in maintenance repair, in the custody of users and in garrison and deployed locations.

**Objective:** To provide agile and flexible logistics IT support to ILS-S customers and users. This requirement provides crossed-trained Technical Subject Matter Expert (SME) support services consisting of the proper mix of experience and competency to support the following customer requirements: Sustainment, LogIT Consolidation/Integration and New Development.

**Scope:** Provide a full range of technical operational support services to support sustainment and development of ILS-S.

**Program Description:** AFRIMS is an unclassified, web-based application, developed by the Air Force to serve as the authoritative source for the management and control of data and information, standardizes Air Force records management ensures legal compliance, and enables data integrity on the Global Information Grid (GIG).

**Objective:** Facilitate enterprise records searches, staff assistance visits, and records staging. Supports 20,000+ registered records professionals and is available via the Air Force Portal to all personnel Air Force wide.

**Scope:** Integrate programming, budgeting, and execution activities for AF programs using the AFRIMS capability. High level requirements will require functional and technical expertise in the following general task and activity areas:

1) Program Management  
2) Help Desk Support  
3) Training Support  
4) Maintenance and Concept Support (DISA Hosting Facility)  
5) Testing

6) Systems Cybersecurity/Info Assurance Certification  
7) System Maintenance/Enhancement & Sustainment  
8) Software Release Management

**Acquisition Approach:**
Small Business Enterprise Applications Solutions (SBEAS)

**Period of Performance:**
Feb 2022 – Feb 2027 (One year base period plus four 1-year option periods)

IndraSoft, Inc., FA8771-12-D-1008 FA8770-17-F-0517
Program Description: IRSS Automates the Joint Capabilities Integration & Development System (JCIDS) process (Ref. CJCSI 3170.01) for approval of warfighting requirements documents, i.e., Initial Capabilities Document (ICD), Capability Production Document (CPD), Operational Requirements Document (ORD); and the SIPRNet environment; currently hosted at Defense Information Systems Agency (DISA) MilCloud+, Gunter Annex.

Objective: Serves the warfighter by speeding time-to-solution, and providing a unique, User driven and supported single injection point for requirements engineering innovations. IRSS facilitates and integrates the operational requirements definition, coordination, and management activities of the warfighter commands including the Air Force Operational Test and Evaluation Center (AFOTEC), the Major Commands (MAJCOMs) and the corporate Air Force (AF).

Scope: Adheres to Agile development as an industry best practice. By utilizing the Agile environment, IRSS rapidly deploys capabilities in releases to deliver quality requirements for the warfighter. The IRSS architecture gives action officers across the AF access to information in a collaborative environment for Documentation, Tasks, and Meeting Management, regardless of geographic location, functional entity, or domain expertise to encompass:
1) Planning
2) Programming
3) Requirements Process

Acquisition Approach:
8(a) Sole Source Direct Award

### Program Description:

The GFM-DI AFOS ensures force-structure data is available for Combatant Commanders’ (COCOMs) use in real-time strategic war planning. The Air Force Organizational Server (AFOS) provides data visibility down to the individual billet and asset level, to include the past, present, and future structure of each AF organization. The AFOS produces consistent force structure data in the Joint Staff J8 format that is well-defined, centrally managed, and interoperable in a net-centric environment for use by other users, systems, and functions as needed.

### Objective:

To support the GFM-DI AFOS mission ensuring War and Contingency Planners in the Air Force and Joint Staff will have timely access to authoritative AF force structure, manpower/platform authorizations, and/or current allocations of the same.

### Scope:

GFM-DI requires contractor support for the development and maintenance of the AFOS Secure Internet Protocol Router (SIPR) and Non-Secure Internet Protocol Router (NIPR) version 3.x within the appropriate Defense Information Systems Agency (DISA) environment.

### Acquisition Approach:

8(a) Sole Source Direct Award

### Period of Performance:

Mar 2022 – Mar 2027 (One-year base period plus four 1-year option periods)

Veteran Corps – Joint Venture
**Program Description:** Family of 6 Medical system used by the AF Medical community to manage information in direct support of 16K active duty AD, AF, ANG and AFR members at fixed bases, bare bases and deployed medical staff locations during peace and wartime operations. The family of systems covers areas such as web applications that tracks waivers and exceptions to policy through their entire lifecycle, and enables the USAF medical community to track medical staff’s personnel, training, and equipment readiness status.

**Objective:** Obtain functional and technical solutions to sustain, maintain, provide life cycle services using agile methodology, and transition to the Cloud.

**Scope:** High level requirements will require functional and technical expertise in the following general task and activity areas: Maintenance Support (CIE/DISA/DHA-MAAG Hosting Facilities), System Maintenance/Enhancement and Sustainment, Software Release Management, Help Desk Support level 1, 2, and 3, Testing, Code/Database rewrites, and transition to the Cloud.

**Program Description:** DEAMS is an accounting Enterprise Resource Planning (ERP) solution based on the Oracle e-Business Suite (EBS), for the USAF and the United States Transportation Command (USTRANSCOM) as established by the Assistant Secretary of the Air Force, Financial Management and Comptroller (SAF/FM). DEAMS provides accurate and timely financial information using standardized business rules and processes and complies with existing laws, regulations and policies. DEAMS is a long-term solution toward sustaining audit readiness and correcting financial reporting weaknesses. The Program and Functional Management Offices reside at Wright-Patterson AFB in Dayton, Ohio.

**Objective:** Continued Development and Sustainment of the DEAMS Enterprise Resource Planning (ERP) System to achieve a fully integrated, auditable financial management system.

**Scope:** Agile software development, system sustainment, help desk, performance tuning, and architecture/hosting changes.

Program Description: IAPS processes payment vouchers for supplies and services to commercial vendors and individuals. It provides automatic payment voucher creation and follow up for missing documents (invoice and receiving reports). IAPS also computes payment due dates, earned discounts and if applicable, interest payments. GAFS – BASELEVEL (BL) is owned and functionally managed by DFAS-Columbus. HIG is responsible for maintaining and modifying the software to include user and operation manuals for the suite. GAFS consists of four functional modules: GAFS, GAFS-DTS, CPAIS and WinGAMPS/WinMOOPS. SMAS performs the accounting functions, including accounts receivable, accounts payable and inventory adjustments and produces trial balance reports for management of the working capital fund. It is a transaction-driven system under general ledger control that maintains accounting records and produces AF Working Capital Fund (AFWCF) Trial Balance Reports for use by Defense Finance and Accounting Service (DFAS).

Objective: Continued Development and Sustainment of the IAPS, GAFS-BL, and SMAS systems.

Scope: Agile software development, system sustainment, help desk, performance tuning, and architecture/hosting changes.

ARRAY Information Technology, Inc., FA8771-12-D-1011 FA8771-17-F-1029
**Program Description:** Client Computing Solutions provides AF warfighters and other designated agency users with secure, standardized client computing devices, providing requirements, ordering, reporting, and other lifecycle aspects in support of government Category Management, Better Buying Power, and other initiatives.

**Objective:** Provide the USAF with strategic source of supply for client computing devices (Laptops, Desktops, Ruggeds, Monitors, Displays)

**Scope:** The CCS-3 Blanket Purchase Agreement vendors will be dedicated strategic sources of supply and provide IT hardware products according to AF/USG defined specifications which meet or exceed security and performance standards. These products will be offered as part of periodic purchase cycles with decentralized ordering through an eCommerce portal which the respective vendors will process and update orders from. Air Force Manual (AFM) 17-1203 addresses the requirement to make information technology purchases via the ITCC programs as a mandatory source.

**Acquisition Approach:**
Multiple Award Blanket Purchase Agreements (BPAs) using GSA Schedule 70

**Period of Performance:**
Dec 2021 – Dec 2026 (One year base period plus four 1-year option periods)

**Anticipated FOPR Release Date:**
2QFY21

**Estimated Dollar Value:**
$700M - $950M

**Incumbents:**
Program Description: As our BES programs migrate to the cloud, CCE framework does not cover some sustainment services previously managed through the hosting environment. These sustainment activities have now been transferred to the program offices creating a gap in support services. This contract is intended to “fill the gap” and other cloud support of BES programs hosted in the CCE, AWS and Azure environments.

Objective: This contract will support PEO BES and related business system programs on their Cloud and Agile journeys, allowing a respective Program Office or App to acquire any Cloud-related skill needed by their capability. The Contractor shall provide support to these programs as they seek to acquire and then grow the necessary competencies to effectively use Cloud One.

Scope: The Contractor shall provide cloud administrative support for BES HI programs hosted in cloud environments, while coordinating activities with PMO and other necessary personnel. Services expected are to be outlined in the SOO and SOW. Task orders should address specific requirements in accordance with AF and DOD standards.

Acquisition Approach:
FAR 19.8 Direct Award – Alaskan Native Corporation (ANC) Indefinite Delivery/Indefinite Quantity (IDIQ) Contract
